Mr. R. T. Ridenoure
Division Manager - Nuclear Operations
Omaha Public Power District
Fort Calhoun Station FC-2-4 Adm.
P.O. Box 550
Fort Calhoun, NE 68023-0550

SUBJECT: CORRECTION TO AMENDMENT NO. 218 FOR THE FORT CALHOUN

STATION, UNIT NO. 1 (TAC NO. MB7498)

Dear Mr. Ridenoure:

On May 8, 2003, the Commission issued Amendment No. 218 to Facility Operating License No. DPR-40 for the Fort Calhoun Station, Unit No. 1 (FCS). The amendment made administrative and editorial changes to several of the FCS Technical Specifications and was in response to your application dated January 27, 2003.

Due to an administrative error, page 3-0a did not reflect a change that was previously made in Amendment No. 215. The corrected page 3-0a is enclosed. We apologize for any inconvenience this may have caused.

Sincerely,

/RA/

Alan B. Wang, Project Manager, Section 2 Project Directorate IV Division of Licensing Project Management Office of Nuclear Reactor Regulation

3.0 **SURVEILLANCE REQUIREMENTS**

- 3.0.1 Each surveillance requirement shall be performed within the specified surveillance interval with a maximum allowable extension not to exceed 25 percent of the specified surveillance interval.
- 3.0.2 The surveillance intervals are defined as follows:

<u>Notation</u>	<u>Title</u>	<u>Frequency</u>
S D W BW M Q SA	Shift Daily Weekly Biweekly Monthly Quarterly Semiannual	At least once per 12 hours At least once per 24 hours At least once per 7 days At least once per 14 days At least once per 31 days At least once per 92 days At least once per 184 days
A R P	Annually Refueling Start up	At least once per 366 days At least once per 18 months Prior to Reactor Start up, if not completed in the previous week.

Exception to these intervals are stated in the individual Specifications.

- 3.0.3 The provisions of Specifications 3.0.1 and 3.0.2 are applicable to all codes and standards referenced within the Technical Specifications. The requirements of the Technical Specifications shall have precedence over the requirements of the codes and standards referenced within the Technical Specifications.
- 3.0.4 Surveillance Requirements shall be met during the MODES or other specified conditions in the individual Limiting Conditions for Operation, unless otherwise stated in the Surveillance Requirement. Failure to meet a Surveillance, whether such failure is experienced during the performance of the Surveillance or between performances of the Surveillance, shall be failure to meet the OPERABILITY requirements for the corresponding Limiting Condition for Operation. Failure to perform a Surveillance Requirement within the allowed surveillance interval, defined by Specifications 3.0.1 and 3.0.2 shall constitute noncompliance with the OPERABILITY requirements for the corresponding Limiting Condition for Operation except as provided in Specification 3.0.5. The time limits of the ACTION requirements are applicable at the time it is identified that a Surveillance Requirement has not been performed. Surveillance Requirements do not have to be performed on inoperable equipment.
- 3.0.5 If it is discovered that a Surveillance was not performed within its specified surveillance interval, then compliance with the requirement to declare the OPERABILITY requirements for the Limiting Condition for Operation not met may be delayed, from the time of discovery, up to 24 hours or up to the limit of the specified surveillance interval, whichever is greater. This delay period is permitted to allow performance of the Surveillance. A risk evaluation shall be performed for any Surveillance delayed greater than 24 hours and the risk impact shall be managed.
