John Bradbury
Division of Waste Management
Office of Nuclear Material Safety
and Safeguards
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Dr. Bradbury:

Enclosed is a report by Technology and Resource Assessment Corporation. This report was requested by this Office. The objective was to compile all known information related to age dating geology and hydrology in the Yucca Mountain region. I believe the resulting report serves a useful purpose relative to oversight of the Yucca Mountain project.

The report is a "snapshot in time." As more data becomes available the report will be revised. If you as part of your research are aware of additional data, your input would be appreciated.

Sincerely,

Carl A. Johnson
Administrator of Technical Programs
