SUBJECT: COOK MEMO OF JANUARY 9, 1984 - BWIP SITE REPORT

The following addresses points raised by this BWIP site report:

Public Notification of Technical Meetings

Concern:

Inadequate public meeting notice.

Resolution:

As a result of pressure by Wright and Cook, DOE established a bulletin board for BWIP public notices in the RHO Science Center. The agenda of upcoming workshops are posted there.

DOE HQ has agreed to maintain a toll-free telephone number to announce schedules and agenda for public meetings conducted under the Morgan-Davis agreement. A federal register notice announcing this service will be issued shortly by DOE. Also, the project specific procedural agreement will contain provisions for posting of meeting schedules and agendas at NRC and DOE PDRs. A Federal Register notice announcing posting procedures will be issued.

Regarding the hydrological data reviews: since these do not involve consultation between DOE and NRC, but are merely a data-gathering mechanism, we see these as coming under data release provision of the project specific agreement and do not expect to notify the public concerning their schedules.

Evaluation of Natural Resources, including Groundwater

Concern:

Identified by PNL as an area of investigation for BWIP.

Resolution:

Included in the agenda for the geology workshop, beginning March 13th.
