TRAINING: No special training requirements have been identified for any documents issued with this change notice.

REMARKS: IMC 2515, Appendix D (Plant Status) has been revised to add a statement to remind resident inspectors to periodically check Part 9900 of the inspection manual to keep current on reporting requirements.

IP 71007 (Reactor Vessel Head Replacement Inspection) has been revised to include regional comments and NRR comments. This inspection procedure was initially issued without comment input to allow its early implementation. Comments have now been received and incorporated into the revised procedure.

IP 71111.21 (Safety System Design and Performance Capability) has been revised to increase the estimated resources from 420 hours to 475 hours at a one-unit site and 500 hours at a multi-unit site.

DISTRIBUTION: Standard
