October 4, 1988

Dr. John L. Russell  
Southwest Research Institute  
Division 20  
P. O. Box 28510  
San Antonio, Texas 78284

Dear Dr. Russell,

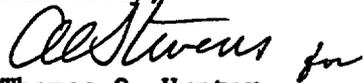

Subject: Sept. 6, 1988 Letter from P. T. Prestholt to C. P. Gertz  
Regarding SLTR88-5001 and RIB Version 3.001

In response to the request of the subject letter, enclosed is a copy of SLTR88-5001, which is entitled "Status Report and Current Contents: NNWSI Site & Engineering Properties Data Base (SEPDB)" and an uncontrolled copy of Version 03.001 of "The Nevada Nuclear Waste Storage Investigations Project Reference Information Base."

The SEPDB is a computer-based data base which contains primarily site characteristics data provided by data-producing activities of the Yucca Mountain Project. The Sandia letter report, which was prepared in August, summarizes the status of the existing hardware and software used for the SEPDB as well as the content of the data base.

Version 03.001 of the RIB was baselined and distributed as a controlled document in December, 1987, in the form of a loose-leaf notebook. This format was chosen to facilitate the incorporation of revisions, which are expected to be released on a periodic basis. Individuals from organizations external to the Project may be added to the controlled distribution for this document through the Project document control system with the approval of the Yucca Mountain Project Manager, Mr. Carl P. Gertz.

Sincerely,

  
Thomas O. Hunter  
Technical Project Officer  
NNWSI Project Department 6310
