TO: Ms. Margaret Federline
FROM: Paul T. Prestholt, Sr. On-Site Licensing Representative
DATE: August 1, 1988
SUBJECT: AGENDA FOR COMMISSIONER CARR'S PROPOSED VISIT TO THE
NEVADA NUCLEAR WASTE STORAGE INVESTIGATION (NNWSI),
SEPTEMBER 20, 1988

Attached is a proposed agenda for Commissioner Carr's visit. As you can see, it makes for a very long day. Comfortable field clothes (shoes) and a hat are suggested.

It is suggested that the DOE briefing scheduled after lunch at the Sample Management Facility (SMF) consist of a description of the make-up of the NNWSI and of the Quality Assurance program. The description of the NNWSI might include how the various organizations that make up the NNWSI interact with each other and how each member's efforts contribute to site characterization.

I have asked Mr. Carl Gertz, Project Manager, DOE Waste Management Project Office to have a geologist with the USGS conduct a geological briefing at trench 14 and on top of Yucca Mountain.

Enclosed are visitor badging forms which must be filled out by each visitor to the NTS and given to the security office ten working days before date of the visit. Please send them back to me. I will prepare the badging request.

If you have any questions or suggestions concerning the agenda, please contact me on FTS: 598-6125. This office's mailing address is:
