

REQUEST FOR J-13 WATER

- 1 -

SEP 18 1989

Mr. Ralph Stein, Associate Director  
for Systems Integration & Regulations  
Office of Civilian Radioactive Waste  
Management  
U. S. Department of Energy RW 30  
Washington, D.C. 20545

Dear Mr. Stein:

The Nuclear Regulatory Commission (NRC) through the Center for Nuclear Waste Regulatory Analyses (CNWRA) and other NRC contractors will be conducting a number of research activities in the areas of waste package and waste package environment. To proceed most efficiently with these activities, NRC has a need for 100 gallons of J-13 well water. We are therefore requesting that DOE provide that amount of J-13 water to NRC as soon as practicable. Paul Prestholt, NRC's On-Site Representative for the Yucca Mountain site, is available to arrange the details of collecting the water with personnel of the Yucca Mountain Project.

If you have any questions regarding this request, please contact King Stablein (FTS 492-0446) of my staff.

Sincerely,

JS

John Linehan, Director  
Repository Licensing and Quality  
Assurance Project Directorate  
Division of High Level Waste Management
