Distribution:

NTS Workshops have been scheduled as follows:

Geochemistry January 12-13, 1983  
Hydrogeology Third week of January  
Design Fourth week of January

(Return to WM, 623-SS)

While specific dates have not been established, workshops have been planned to address geologic stability and waste form/waste package during March 1983.

The agreement that I reached with Don Vieth regarding the workshops includes a commitment on the part of DOE-NV to send us an information package one month prior to each workshop. In the time that remains before each of the scheduled workshops, we need to accomplish the following:

1. Provide input to DOE as to what we would like to see in the information packages,
2. Establish sets of discussion questions that can serve as the bases for workshop agendas;
3. Prepare lists of any specific data or other information that we need to see and/or discuss at the workshop.
