Cynthia D. Taylor
Health Physicist
Sam Nunn Atlanta Federal Center
Suite 23T85
61 Forsyth Street, SW
Atlanta, GA 30303-3415

Dear Cynthia,

It was a pleasure to meet you the other day. I hope you were able to get to see most of the museums.

This letter is to inform you that the natural uranium has left our site as of yesterday, Thursday, July 17, 2003 at approximately 4:35 PM. I understand that it is scheduled to arrive in Mercury, Nevada on Tuesday.

I have also informed Bryan Parker by voice mail and e-mail.

Sometime, if you are in the area again, I would like to go over some of our procedures with you for the maintaining of our other license. I was a Radiation Safety Officer at SUNY Maritime College in the Bronx, New York for eleven years (1979-1990). In New York City it was the Department of Health, Bureau for Radiation Control that was the issuer of the licenses that we had. Everything here seems the same as then, but I just want to be sure.

Regards,

Bruce R. Boller
