Mr. Robert Browning, Director
Division of Waste Management
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Browning:

The State of Mississippi is concerned about its lack of notification of the meetings of the Commission held with the Department of Energy on January 23 and 24. Although Mississippi did not formally submit comments on the amendments to 10 CFR 60, it has a vested interest in the proceedings to amend the licensing requirements for a geologic repository. This State also has an interest in the siting of a MRS. In the past the Commission staff and my staff have had a good working relationship. I hope that this oversight will be rectified and would ask that we be notified of such meetings as early as possible. I look forward to our continued good working relationship.

Very truly yours,

John W. Green
Interim Executive Director
