MEMORANDUM FOR: George Eysymontt, Acting Director
Division of Computer and Telecommunications
Services

FROM: Robert E. Browning, Director
Division of High-Level Waste Management

SUBJECT: PROGRAMMING AND SYSTEM ASSISTANCE FOR IBM APPLICATION
SYSTEMS SOFTWARE

I have been advised that our PROFS, STAIRS, and Application Systems software programs will be transferred from IBM Tampa to an NRC 9370 and The DOJ Computer at the end of December. I have also been advised that I should make a formal request to you to ensure that future assistance will be available to assist in system operation problems or Application Systems program changes as may be required after the move from IBM.

The Division of High-Level Waste Management (HLWM) presently use PROFS, STAIRS (to be converted to Inquire) and two programs prepared on Application Systems. It is to be anticipated that we will have continued need for assistance in system operation and Application System programming. Accordingly it is requested that ARM make provision for staff or contractor assistance to HLWM. Technical assistance would be on an as-needed-basis, with the major need expected immediately after the conversion, and is not presently expected to exceed three staff months total effort over the year.

Please contact Phil Altomare on x74677 if you have any questions or require additional information.
