SUBJECT: DEVELOPMENT OF WORK PLAN FOR REVIEW OF ENGINEERED BARRIER
SYSTEM REQUIREMENT, 10 CFR 60.113a1

I am preparing a work plan for development of review capability for the engineered barrier system (EBS) performance objective. The work plan will integrate review capability currently being developed for waste package performance and geologic criteria with areas that are unique to EBS performance evaluation. I request input and assistance from D. Brooks, K. Chang, D. Codell, T. McCartin, and J. Voglewede. I propose that these individuals from various matrix disciplines coordinate their input through J. Hunt, who will assume the lead responsibility for developing review procedures for EBS performance evaluation. J. Hunt, also, will facilitate transfer of information on EBS performance back to waste package and geologic criteria performance evaluation efforts. I have reserved the 4th floor conference room for Thursday, January 3, 1985 at 10 A.M., to discuss this proposed work plan. Please attend or send a representative to the meeting.
