

Mr. Lake H. Barrett, Acting Director
 Office of Civilian Radioactive
 Waste Management
 U.S. Department of Energy
 1000 Independence Avenue, SW
 Washington, D.C. 20585

MAY 13 1993

Dear Mr. Barrett:

SUBJECT: REVISED PROCEDURAL AND PROJECT-SPECIFIC AGREEMENTS

The purpose of this letter is to transmit the subject agreements for your review and signature. These documents outline the revised procedures for staff consultation and exchange of information which the Nuclear Regulatory Commission and the U.S. Department of Energy and its designated contractors will observe in connection with the characterization of sites for a geologic repository under the Nuclear Waste Policy Act of 1982, as amended. Your staff and the NRC have been working closely together over the last several years to revise both agreements to reflect the current status and operating procedures for the site characterization program of a high-level waste repository.

Enclosed are two original copies of both agreements for signature. Please sign both copies, and return one to me. Also enclosed, for reference purposes, is a line-in-line-out copy of both original agreements to facilitate review of the revisions. Consistent with previous formatting guidelines, newly added language is denoted with brackets [], and language deleted from the agreements is marked through with a line.

If you have any questions concerning these agreements, or the revisions made therein, please contact me or Mr. Joseph J. Holonich of my staff. I can be reached at (301) 504-3352, or Mr. Holonich can be reached at (301) 504-3387.

Sincerely,
 Original signed by
 Robert M. Bernero
 Robert M. Bernero, Director

PROCEDURAL AGREEMENT BETWEEN THE NUCLEAR REGULATORY COMMISSION AND THE U.S. DEPARTMENT OF ENERGY IDENTIFYING GUIDING PRINCIPLES FOR INTERFACE DURING GEOLOGIC SITE INVESTIGATION AND SITE CHARACTERIZATION

This Procedural Agreement outlines procedures for staff consultation and exchange of information which the Nuclear Regulatory Commission and the U.S. Department of Energy (DOE) and its designated contractors will observe in connection with the characterization of sites for a geologic repository under the Nuclear Waste Policy Act of 1982, as amended (NWPAA). The purpose of these procedures is to assure that an information flow is maintained between the two agencies which will facilitate the accomplishment by each agency of its responsibilities relative to site investigation and characterization under the NWPAA. The agreement is to assure that NRC receives adequate information on a timely basis to enable NRC to review, evaluate, and comment on those DOE activities of regulatory interest in accordance with DOE's project decision schedule and thereby facilitate early identification of potential licensing issues for timely resolution. The agreement is to assure that DOE has prompt access to NRC for discussions and explanations relative to the intent, meaning and purpose of NRC comments and evaluations of DOE activities and so that DOE can be aware, on a current basis, of the status of NRC actions relative to DOE activities.

This Procedural Agreement shall be subject to the provisions of any project decision schedule, or any schedules specifically related thereto, that may hereafter be established by DOE, and any regulations that may hereafter be adopted by NRC, pursuant to law. In particular, nothing herein shall be construed to limit the authority of the Commission to require the submission of information as part of a general plan for site characterization activities to be conducted at a candidate site or the submission of reports on the nature and extent of site characterization activities at a candidate site and the information developed from such activities. In accordance with 10 CFR 60.18(1), no action taken pursuant to this agreement shall be deemed to constitute a commitment to issue any authorization or license, or in any way affect the authority of the Commission, its officers, and staff, in any licensing proceeding.

1. NRC On-Site Representatives

As early as practicable following area phase field work, NRC on-site representatives will be stationed at any site undergoing investigation principally to serve as a point of prompt informational exchange and consultation and to preliminarily identify concerns about such investigations relating to potential licensing issues.

2. Interactions

From the time this agreement is entered into, and for so long as site characterization activities are being planned or are in progress, DOE and NRC will schedule and hold interactions periodically as provided in this section. Interactions are classified as technical meetings, technical exchanges, site visits, or licensing and management meetings. A written report agreed to by both DOE and NRC will be prepared for each interaction.

- a. Technical meetings will be held between DOE and NRC technical/licensing staff to: review and consult on interpretations of data; identify potential licensing issues; agree upon the sufficiency of available information and data; and agree upon methods and approaches for the acquisition of additional information and data as needed to facilitate NRC reviews and evaluations and for staff resolution of such potential licensing issues. Technical meetings may be a forum for the expression of technical/regulatory policy, negotiation of commitments and an agreement on the acceptability of actions on the part of both agencies.
- b. Technical exchanges will be held between DOE and NRC technical/licensing staff to: discuss a specific technical and/or regulatory topic within their areas of expertise (e.g., geology, hydrology, seismology, waste package design, repository design). The primary purpose of a technical exchange is to promote a better mutual understanding of the topic prior to an officially established technical or regulatory position. For example, a discussion of the mechanism of a process, the occurrence of a particular event, or the technical aspects of regulatory interpretations is appropriate for discussion during a technical exchange. Technical exchanges will not be used as a forum to officially establish or change technical and/or regulatory positions, or extract commitments, or agree to courses of action.
- c. Site visits will be held between DOE and NRC technical staff to: explain technical information related to ongoing field or laboratory site characterization activities; and visit locations at the site for field briefings and discussions of preliminary data and interpretation derived from ongoing work. The primary purpose of a site visit is for both agencies to benefit from discussion of technical topics in the field. The itinerary for site visits will be developed and noticed similar to a technical exchange agenda. The documentation requirements for the proceedings of site visits are not the same as for technical exchanges, due to the formative nature of preliminary data and interpretations. Site visits will not be used as a forum to officially establish or change technical and/or regulatory positions, establish commitments, nor agree to courses of action. Proceedings covered by Appendix 7 of the "Agreement Between the U.S. Department of Energy Office of Civilian Radioactive Waste Management and the Nuclear Regulatory Commission Division of High-Level Waste Management During Site Characterization Programs and Prior to the Submittal of an Application for Authorization to Construct a Repository" (hereafter referred to as the Repository Project-Specific Agreement) do not apply to site visits.
- d. Licensing and management meetings will be held whenever necessary, but at least semi-annually, to review the summary results of the technical interactions; to review the status of outstanding concerns and issues; to discuss plans for resolution of outstanding items and issues; to update the schedule of technical meetings and other actions needed for staff resolution of open items regarding site characterization

programs; and to consult on what guidance is advisable and necessary for NRC to prepare. Unresolved management issues will be promptly elevated to upper management for resolution. Licensing and management meetings are conducted to discuss major nontechnical issues related to program policy, schedules, scope, and major commitment of resources. Any commitments that are made during the meeting will be documented into formal correspondence by the party(ies) making the commitments.

- e. Early interactions will be scheduled as needed to discuss written NRC comments on DOE documents such as Study Plans, DOE's semi-annual progress reports, and technical reports to foster a mutual understanding of comments and the information or activities needed for staff resolution of the comments.
- f. In formulating plans for activities which DOE will undertake to develop information needed for staff resolution of potential licensing issues, DOE will meet with NRC to provide an overview of the plans so that NRC can comment on their sufficiency. These discussions will be held sufficiently early so that any changes that NRC comments may entail can be duly considered by DOE in a manner not to delay DOE activities.
- g. Schedules of activities pertaining to interactions will be made publicly available. Potential host States, affected units of local government, and affected Indian Tribes will be notified and invited to attend interactions covered in this section (Section 2, Interactions). The notification will be given on a timely basis by NRC 10 working days prior to the interaction, where possible. These interactions will be open, with members of the public being permitted to attend as observers.

3. Timely Release of Information

- a. Data collected during site investigations will be made available to NRC on a current, continuing basis after DOE (or DOE contractor) performs internal checks that are inherent in determining that the data were obtained and documented properly, in accordance with applicable quality assurance requirements and procedures.
- b. DOE's analyses and evaluations of data will be made available to NRC in a timely manner.
- c. DOE will provide, in a timely manner to NRC, controlled copies of any specially developed computer programs used in making site characterization analyses, performance assessments, or design analyses.

4. Samples

In accordance with Appendix 2, "Acquisition of Samples During Site Characterization Activities by NRC Contractors," of the Repository Project-Specific Agreement and applicable DOE controlled administrative

procedures, DOE will provide NRC with samples to be used by NRC for independent analysis and evaluation. Controlled copies of the applicable procedures shall be provided to the NRC's Director, Repository Licensing and Quality Assurance Project Directorate or designee.

5. Agency Use of Information

It is understood that information made available to either agency under this agreement may be used at that agency's option in carrying out its responsibilities.

6. Project Specific Agreements

Specific agreements will be developed for each project and site under investigation.

7. Consultations

Nothing in this agreement shall be construed as limiting forms of informal consultation not mentioned in this agreement (for example, telephone conversation or exchanges of reports). These other consultations will be documented in a timely manner.

8. QA Audits and Surveillances

NRC staff, and consistent with security access and safety rules, representatives from affected units of State, local governments, and Indian Tribes, will be permitted to observe DOE QA audits and surveillances. In addition, the NRC may perform audits of DOE and participant QA programs.

Date: May 13, 1993

AGREEMENT BETWEEN THE U.S. DEPARTMENT OF ENERGY OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT AND THE NUCLEAR REGULATORY COMMISSION DIVISION OF HIGH-LEVEL WASTE MANAGEMENT DURING SITE CHARACTERIZATION PROGRAMS AND PRIOR TO THE SUBMITTAL OF AN APPLICATION FOR AUTHORIZATION TO CONSTRUCT A REPOSITORY

This agreement implements, on a repository project-specific basis, the "Procedural Agreement Between the Nuclear Regulatory Commission and the U.S. Department of Energy Identifying Guiding Principles for Interface During Geologic Site Investigation and Site Characterization" (hereafter referred to as the Procedural Agreement) made between the Nuclear Regulatory Commission and the U.S. Department of Energy (DOE), and supersedes all previous project-specific agreement(s) between NRC's Division of High-Level Waste Management (HLWM) and DOE's Office of Civilian Radioactive Waste Management (OCRWM) regarding information exchange and consultation for potential repository sites. This agreement implements Section 6 of the Procedural Agreement which requires that project-specific agreements, tailored to the specific project and reflecting differences in sites and project organizations be negotiated to implement the principles established in the Procedural Agreement. Because this repository project level agreement is drawn to implement the principles set forth in the Procedural Agreement, appendices detailing repository project-specific items will be developed as necessary. These appendices will be updated, added to, or changed as required. Nothing in this agreement shall be construed either to modify the Procedural Agreement in any way or to confer rights on any party other than the parties to these agreements.

1. NRC On-Site Representatives (ORs)

At such time as the NRC ORs are stationed at the site, they are to be provided with office space that is near the DOE project office and site activities. Where such office space can be provided, DOE is to provide such space near the site activities and the NRC is to provide space that can be visited by the public.

The NRC OR shall be afforded access to personnel, project records and facilities at the respective site, research facilities and other contractor and subcontractor areas. Access will be subject to applicable requirements for proper identification and compliance with applicable access control measures for security, radiological protection and personnel safety. DOE will identify, at the time it makes information available to NRC, any records which it considers exempt from public disclosure under the Freedom of Information Act. NRC, following consultation with DOE, will withhold such information from public disclosure to the extent stated in 10 CFR Part 9. Records as used above are defined as all records that would be generally relevant to a potential licensing decision by the Commission. Included in this category are records kept by DOE and DOE contractors and subcontractors accessible to DOE.

Project-specific conditions are discussed in the appendices.

2. Interactions

A. Interactions

Schedules agreed on, pursuant to Section 2g of the Procedural Agreement, for future interactions covering approximately a six month period will be updated at least bi-weekly and made available in the local and headquarters public document rooms (PDRs) of both NRC and DOE. In addition, toll-free telephone services will be operated by DOE headquarters and NRC to announce the meeting schedules. A description of this process for making the schedule of upcoming interactions publicly available will be provided by a DOE annual Federal Register Notice. Representatives from the affected State, units of local governments, and Indian Tribes will be given the opportunity to participate at the interactions. These interactions will be open, with members of the public being permitted to attend as observers, consistent with security access and safety rules.

Dates for major interactions will be agreed to as far in advance as is practicable, with a time frame of six months in advance as the goal. Final agreement as to agenda and participants will both be reached normally a minimum of 10 working days prior to the scheduled date for the meeting and be made available in the PDRs. Deviations from the agreed to agenda will be discussed among all organizations that participate in developing the agenda. Changes will be agreed upon by DOE and NRC. Although both agencies will use their best efforts to provide the indicated lead times, nothing in this section shall be construed as preventing the scheduling of interactions with shorter lead times by mutual agency agreement.

B. Licensing and Management Meetings

As part of the discussion during licensing and management meetings held under Section 2c of the Procedural Agreement, issues related to policy, budget, program scope, commitment of resources and program schedules may be included as appropriate. The procedures established in Section 2A above regarding dissemination of schedules and agendas for the technical interactions will also be used to disseminate schedules and agendas for the licensing and management meetings. Any commitments that are made during the meeting will be documented into formal correspondence by the party(ies) making the commitments.

C. Interaction Reports

The format of the interaction report should include a short introductory paragraph stating the date of the interaction, the organizations that participated, and the purpose. Attached to the minutes should be the list of attendees. In the body, the minutes should describe the presentations made and the discussions held during the interaction. Information presented in the minutes will only report the events that took place during the interaction. Copies of

presentation materials should be included as attachments to the minutes. Copies of materials such as preliminary data, maps, logs, and laboratory books discussed at site visits are not prepared as documentation of the interaction. Documentation may be provided, upon request, to a participant on a site visit in accordance with Section 3a of the Procedural Agreement. Following preparation of the minutes and an informal review within DOE and NRC to assure accuracy, NRC and DOE lead representatives will sign the minutes. An opportunity will be provided for representatives from the State, affected units of local government, and affected Indian Tribes to include in the summary any positions they had taken in the interaction. DOE and NRC will issue interaction reports within 30 days after the interaction. If a jointly approved NRC/DOE interaction report is not issued within 30 days, NRC and DOE may elect to issue an independent record of events of the interaction. Interaction reports will be provided to the State, affected units of local government, affected Indian Tribes, and the NRC and DOE PDRs. NRC will provide the joint reports. If DOE and NRC issue separate reports, each agency will be responsible for providing only its own report.

3. Timely Release of Information

A. Report Inventory

Each agency will develop as soon as practicable and thereafter maintain and exchange an inventory of reports, plans, procedures, and technical positions (products) both completed and in process. This inventory will include descriptions of product scope and purpose as well as the scheduled dates for completion of draft and final products. The inventories will be updated and exchanged at least semi-annually. This will allow each agency to request products from the other.

B. Points of Contact

Respective points of contact for DOE and NRC are defined in appropriate appendices. Either agency may change their points of contact unilaterally with prior notification to the other party. Other organizations within NRC working on the high-level waste repository will use these designated points of contact within NRC's HLWM for interactions with DOE's OCRM. Details of the information exchange will be determined by DOE requirements and defined in appendices as appropriate.

Telephonic communications covered under Item c in Appendix 1 are intended solely for the exchange of information and ideas by NRC and DOE personnel involved in the various technical areas relating to the site information program for the potential repository site. Individuals participating in such communications have no authority to present official NRC or DOE positions, or to make official policy statements on behalf of either NRC or DOE.

C. Site Characterization Data for the Potential Repository Site.

To keep the NRC on-site representative informed regarding what data will be forthcoming and when, DOE will notify the on-site representative of the schedule of planned field and laboratory testing covering as long a period as practicable. The representative will also be notified of changes to the test schedule.

DOE will develop, as soon as practicable, and thereafter maintain a catalog of all site characterization data, except those excluded by law. Descriptions of data in the catalog will include: time, place, and method of acquisition; an indication of the scope of the information; and the location where they may be examined. This catalog will be maintained in a computer data base, readily available for read-only access by the NRC, as soon as possible, in a mutually agreed upon electronic format by NRC and DOE. The data catalog will be updated in accordance with DOE procedures. When developed and implemented, revisions to the documentation for access to the data catalog will be provided to NRC as they are made. DOE will revise the data catalog on a quarterly basis and provide NRC with a hard copy or a mutually agreeable electronic format and medium until computer access is available.

Upon NRC request and at a location chosen by DOE, DOE will make data available to NRC for examination. After the quality assurance checks specified in Section 3a of the Procedural Agreement have been completed (which will normally be within 45 days from data acquisition either in the laboratory or in the field), data will be provided to NRC in hard copy format, or in a mutually agreeable electronic format and medium upon request. As site characterization proceeds, DOE may find it advantageous to maintain electronic data bases containing basic processed data. As these data bases become available on-line to the participants, the NRC will be allowed on-line, read-only¹ computer access to these systems provided that all questions of security, and comparable access to the State and the public can be resolved in a manner that protects the integrity of the system.

Because of the preliminary nature of these data, all such data placed in the PDR will carry the following caveat: "QA checks on data contained here have only been performed to determine that the data have been obtained and documented properly. DOE cautions that any information is incomplete and preliminary. This information is subject to change as a more representative data base is accumulated. Any analyses and interpretations should be made accordingly."

¹ "read-only" means that the data file can be read, copied, and down-loaded (ie., the copied portion of the file can be electronically transmitted to another file for the reader's use), but that no manipulation or changes to the original master data file can be performed by the reader.

NRC will also notify DOE of its schedule (and those of its contractors) of planned field and laboratory testing conducted at or with samples from the potential repository site and will establish, maintain, update, and provide to DOE an inventory of, and access to, data as described in the preceding paragraphs.

Upon request by NRC or DOE, either party will provide the other a controlled copy(ies) of any specially developed or modified computer programs (including programming within commercially available software and associated linking programs or programs passing data) used in making site characterization analyses, performance assessments, design analyses, and design drawings, subject to resolution of proprietary, privileged, or licensing concerns. Such programs will be available to NRC or DOE upon citation in a programmatic document (i.e., documents published by either party). Each party must maintain this software under its own appropriate software configuration management controls. Such programs will be provided in a mutually agreed upon electronic medium. Each party will provide relevant specifications for use of requested software; however, each party will be responsible for acquisition and maintenance of the commercially available software and/or hardware needed to run the programs requested. Each party will pay for any respective licensing and maintenance costs associated with such hardware and/or software.

4. Samples

In accordance with Appendix 2, DOE will provide NRC with samples.

5. Terms of Agreement

The terms of this agreement may be amended at any time by mutual consent, in writing.

6. Effective Date

This agreement shall enter into force on the latter date of signature by the parties.

Hydrology	Hydrologic Transport Section Leader or designee	Chief, Site Investigations Branch
Geochemistry	Hydrologic Transport Section Leader or designee	Chief, Site Investigations Branch

d. NRC On-site Representative (OR)

Communications and interactions between the NRC OR and DOE are discussed in Appendix 7.

Appendix 2

ACQUISITION OF SAMPLES DURING SITE CHARACTERIZATION ACTIVITIES BY NRC CONTRACTORS

Requests for collection of samples (e.g., geologic, simulated glass, concrete, steel, water, air, plants, animals, etc.), with NRC-supplied specifications and for which a process of acquisition is not specified in a Yucca Mountain Project Office (YMPO) Administrative or Branch Technical Procedure, are recognized by DOE as legitimate. Upon review and acceptance of the request, DOE will arrange for NRC to receive such requested materials in response to a written request. DOE may request NRC, on a case-by-case basis, to reevaluate the amount of sample material requested in light of the needs of the site characterization program and the availability of samples. DOE will prepare NRC-specified samples for transport.

Controlled copies of all applicable YMPO Samples Acquisition and Handling Procedures will be provided to the NRC's Director, Repository Licensing and Quality Assurance Project Directorate, Division of High-Level Waste Management or designee. The NRC will use these procedures to request samples from DOE, which are being obtained as part of the site characterization program.

Appendices 3 - 6 Reserved

Appendix 7

AGREEMENT CONCERNING THE NUCLEAR REGULATORY COMMISSION ON-SITE REPRESENTATIVE FOR THE REPOSITORY PROJECTS DURING SITE CHARACTERIZATION

The purpose and objective of the on-site representative (OR), as identified in Section 1 of the Procedural Agreement, is to serve as a point of prompt informational exchange and consultation and to preliminarily identify concerns about investigations relating to potential licensing issues.

This appendix is intended to supplement the base agreement and to detail the guidelines which will govern interaction between the NRC OR, including any NRC personnel assigned to the OR, and DOE contractor personnel (prime and sub) through the project's Regulatory Interactions Branch of the Regulatory and Site Evaluation Division. Any interactions between the OR and DOE, its contractors, or subcontractors identified in this appendix will not constitute interactions within the intent of Section 2 of the Procedural Agreement and therefore will not require the preparation of written reports and will not be subject to State/Tribal and public notification and participation or schedule requirements of Section 2 of the Procedural Agreement. The interactions of the OR with DOE and its contractors and subcontractors are not intended to interfere with or replace other channels of NRC/DOE communications and procedures for information release identified in Sections 2, 3A, and 3B of the this agreement and Sections 2, 3, 7, and 8 of the Procedural Agreement.

The following points are agreed to:

1. The OR can attend any meetings on-site or off-site dealing with technical questions or issues related to work required as part of site characterization (e.g., any items to be covered in Site Characterization Plans under the Nuclear Waste Policy Act, as amended) following notification of the cognizant DOE project representative responsible for the meeting as discussed below. Such notification shall be by memorandum, telephone or personal contact and will be given at least 24 hours in advance where DOE has provided adequate prior notification to the OR. The meetings may involve solely DOE or solely DOE's contractors (prime and sub), or any combination of DOE with their contractors.

If objections to the OR attendance are voiced for any reason, the reason should be specified. Such objections will be infrequent and will be exceptions to the rule. If the OR does not agree with DOE objections, it will be raised to a higher management level for resolution. If resolution cannot be achieved, the OR will not attend the meeting in question.

2. The OR may communicate orally (in person or by phone) with persons employed by DOE, DOE's prime contractors or the prime's subcontractor, (on-site or off-site), providing that the following procedures are followed. If practicable, the OR will arrange for all individual sessions with prime contractor and subcontractor staff by contacting the DOE YMPO Regulatory Interactions Branch Chief or designated DOE staff member. If they cannot be contacted, the OR will attempt to contact the proper prime contractor, section, or department manager. As a minimum, the OR will give timely notification of all such sessions to DOE and the affected

contractor or participant(s) management as soon as possible. The OR will avoid discussions with personnel when it would appear to disrupt important duties and will seek to schedule meetings at a mutually convenient time. It is at the option of DOE, in consultation with participant management, as to whether or not a staff member, supervisor, or third party is to be present. No record of such discussions is required; however, questions that are raised or other issues that arise as a result of these interactions will be reported by the participant to the YMPO Regulatory Interactions Branch Chief, or the NRC Repository Licensing and Quality Assurance Project Directorate, as appropriate.

When NRC headquarters staff is temporarily assigned to the OR office, the NRC Director, Repository Licensing and Quality Assurance Project Directorate, or designee, will notify DOE's Chief of the Regulatory Integration Branch of the reassignment at least one week prior to the reassignment.

3. The DOE project office, DOE prime contractors, and their subcontractors will provide the OR access to records which would be generally relevant to a potential licensing decision by the Commission as follows. Upon request by the OR, DOE or the DOE contractor or subcontractor shall provide:
1) copies of any records of data; 2) records which document the analyses, evaluations, or reduction of data; or 3) records which contain information deduced by reason. These records will be made available to the OR, after the documentation has been reviewed and approved in accordance with the appropriate project office administrative procedure. Records that have not been reviewed and approved by the project office shall be made available for viewing, but not to copy or to retain, at any stage of completion. Requests by the OR for release of such records shall be made through and authorized by the YMPO Regulatory Interactions Branch Chief or staff.
4. Copies of pre-decisional and preliminary drafts of documents required by the Nuclear Waste Policy Act of 1982 as amended, or related to prelicensing activities, which have not been approved by DOE, will not be provided to the OR without DOE approval. Documents of this type may be made available by authorized DOE personnel, for review in DOE or DOE contractor offices. Such documents may not be authorized as available by a DOE contractor alone. Any such documents made available are for the use of the OR and shall not be placed in any NRC public document room.
5. The OR does not have the authority to direct DOE, its contractors or subcontractors to perform any work. Any formal identification of questions or issues for investigation by DOE that could result in contractor or subcontractor work must be formally presented to DOE through the NRC Repository Licensing and Quality Assurance Project Directorate in writing.
6. The OR will attend on-site meetings upon request by the DOE project office or prime contractor on-site whenever possible. The OR will provide any records which would normally be available under 10 CFR Part 2.790 of the

Commission's regulations to project participants upon request to copy. If convenient, copies of such records will be provided by the OR.

7. The OR shall be afforded access to the site, research facilities, and other contractor and subcontractor areas to observe testing or other data gathering activities, in progress, as part of site characterization subject to compliance with the applicable requirements for identification, and applicable access control measures for security, radiological protection and personnel safety, provided that such access shall not interfere with the activities being conducted by DOE or its contractors and that any discussions conducted during such access shall comply with Point 2 above.

Such access shall be allowed as rapidly as it is for DOE or DOE contractor employees upon display of an appropriate access identification badge, or, if badging is not possible for national security reasons, upon prior notification to DOE or cognizant contractor supervisory personnel (by memorandum, telephone, or personal contact). When an access identification badge is available to DOE or DOE's contractors and subcontractors on a routine basis, it shall be made available to the OR upon completion of the required security clearances and appropriate radiological and personnel safety training. DOE will ensure that any training required is provided to the OR.

8. NRC can videotape or photograph any inanimate objects or geologic features associated with site characterization activities at the Yucca Mountain Site consistent with Nevada test site security. Additionally, upon request from the OR, DOE will provide NRC videotape footage of personnel performing site characterization activities. If requested, the OR and other NRC staff will be permitted to accompany DOE during the videotaping.
9. DOE YMPO may provide, to the NRC OR, the information required to execute DOE responsibilities under Appendix 7 of this agreement by informal note, by telephone, or by personal contact. Such communications shall adhere to the procedures for communication and information release specified elsewhere in the Procedural Agreement and this agreement.

PROCEDURAL AGREEMENT BETWEEN THE NUCLEAR REGULATORY COMMISSION AND THE U.S. DEPARTMENT OF ENERGY IDENTIFYING GUIDING PRINCIPLES FOR INTERFACE DURING GEOLOGIC SITE INVESTIGATION AND SITE CHARACTERIZATION

This Procedural Agreement outlines procedures for staff consultation and exchange of information which the Nuclear Regulatory Commission and the U.S. Department of Energy (DOE) and its designated contractors will observe in connection with the characterization of sites for a geologic repository under the Nuclear Waste Policy Act of 1982, as amended (NWPAA). The purpose of these procedures is to assure that an information flow is maintained between the two agencies which will facilitate the accomplishment by each agency of its responsibilities relative to site investigation and characterization under the NWPAA. The agreement is to assure that NRC receives adequate information on a timely basis to enable NRC to review, evaluate, and comment on those DOE activities of regulatory interest in accordance with DOE's project decision schedule and thereby facilitate early identification of potential licensing issues for timely resolution. The agreement is to assure that DOE has prompt access to NRC for discussions and explanations relative to the intent, meaning and purpose of NRC comments and evaluations of DOE activities and so that DOE can be aware, on a current basis, of the status of NRC actions relative to DOE activities.

This Procedural Agreement shall be subject to the provisions of any project decision schedule, or any schedules specifically related thereto, that may hereafter be established by DOE, and any regulations that may hereafter be adopted by NRC, pursuant to law. In particular, nothing herein shall be construed to limit the authority of the Commission to require the submission of information as part of a general plan for site characterization activities to be conducted at a candidate site or the submission of reports on the nature and extent of site characterization activities at a candidate site and the information developed from such activities. In accordance with 10 CFR 60.18(l), no action taken pursuant to this agreement shall be deemed to constitute a commitment to issue any authorization or license, or in any way affect the authority of the Commission, its officers, and staff, in any licensing proceeding.

1. NRC On-Site Representatives

As early as practicable following area phase field work, NRC on-site representatives will be stationed at any site undergoing investigation principally to serve as a point of prompt informational exchange and consultation and to preliminarily identify concerns about such investigations relating to potential licensing issues.

2. Interactions

From the time this agreement is entered into, and for so long as site characterization activities are being planned or are in progress, DOE and NRC will schedule and hold interactions periodically as provided in this section. Interactions are classified as technical meetings, technical exchanges, site visits, or licensing and management meetings. A written report agreed to by both DOE and NRC will be prepared for each interaction.

- a. Technical meetings will be held between DOE and NRC technical/licensing staff to: review and consult on interpretations of data; identify potential licensing issues; agree upon the sufficiency of available information and data; and agree upon methods and approaches for the acquisition of additional information and data as needed to facilitate NRC reviews and evaluations and for staff resolution of such potential licensing issues. Technical meetings may be a forum for the expression of technical/regulatory policy, negotiation of commitments and an agreement on the acceptability of actions on the part of both agencies.
- b. Technical exchanges will be held between DOE and NRC technical/licensing staff to: discuss a specific technical and/or regulatory topic within their areas of expertise (e.g., geology, hydrology, seismology, waste package design, repository design). The primary purpose of a technical exchange is to promote a better mutual understanding of the topic prior to an officially established technical or regulatory position. For example, a discussion of the mechanism of a process, the occurrence of a particular event, or the technical aspects of regulatory interpretations is appropriate for discussion during a technical exchange. Technical exchanges will not be used as a forum to officially establish or change technical and/or regulatory positions, or extract commitments, or agree to courses of action.
- c. Site visits will be held between DOE and NRC technical staff to: explain technical information related to ongoing field or laboratory site characterization activities; and visit locations at the site for field briefings and discussions of preliminary data and interpretation derived from ongoing work. The primary purpose of a site visit is for both agencies to benefit from discussion of technical topics in the field. The itinerary for site visits will be developed and noticed similar to a technical exchange agenda. The documentation requirements for the proceedings of site visits are not the same as for technical exchanges, due to the formative nature of preliminary data and interpretations. Site visits will not be used as a forum to officially establish or change technical and/or regulatory positions, establish commitments, nor agree to courses of action. Proceedings covered by Appendix 7 of the "Agreement Between the U.S. Department of Energy Office of Civilian Radioactive Waste Management and the Nuclear Regulatory Commission Division of High-Level Waste Management During Site Characterization Programs and Prior to the Submittal of an Application for Authorization to Construct a Repository" (hereafter referred to as the Repository Project-Specific Agreement) do not apply to site visits.
- d. Licensing and management meetings will be held whenever necessary, but at least semi-annually, to review the summary results of the technical interactions; to review the status of outstanding concerns and issues; to discuss plans for resolution of outstanding items and issues; to update the schedule of technical meetings and other actions needed for staff resolution of open items regarding site characterization

programs; and to consult on what guidance is advisable and necessary for NRC to prepare. Unresolved management issues will be promptly elevated to upper management for resolution. Licensing and management meetings are conducted to discuss major nontechnical issues related to program policy, schedules, scope, and major commitment of resources. Any commitments that are made during the meeting will be documented into formal correspondence by the party(ies) making the commitments.

- e. Early interactions will be scheduled as needed to discuss written NRC comments on DOE documents such as Study Plans, DOE's semi-annual progress reports, and technical reports to foster a mutual understanding of comments and the information or activities needed for staff resolution of the comments.
- f. In formulating plans for activities which DOE will undertake to develop information needed for staff resolution of potential licensing issues, DOE will meet with NRC to provide an overview of the plans so that NRC can comment on their sufficiency. These discussions will be held sufficiently early so that any changes that NRC comments may entail can be duly considered by DOE in a manner not to delay DOE activities.
- g. Schedules of activities pertaining to interactions will be made publicly available. Potential host States, affected units of local government, and affected Indian Tribes will be notified and invited to attend interactions covered in this section (Section 2, Interactions). The notification will be given on a timely basis by NRC 10 working days prior to the interaction, where possible. These interactions will be open, with members of the public being permitted to attend as observers.

3. Timely Release of Information

- a. Data collected during site investigations will be made available to NRC on a current, continuing basis after DOE (or DOE contractor) performs internal checks that are inherent in determining that the data were obtained and documented properly, in accordance with applicable quality assurance requirements and procedures.
- b. DOE's analyses and evaluations of data will be made available to NRC in a timely manner.
- c. DOE will provide, in a timely manner to NRC, controlled copies of any specially developed computer programs used in making site characterization analyses, performance assessments, or design analyses.

4. Samples

In accordance with Appendix 2, "Acquisition of Samples During Site Characterization Activities by NRC Contractors," of the Repository Project-Specific Agreement and applicable DOE controlled administrative

procedures, DOE will provide NRC with samples to be used by NRC for independent analysis and evaluation. Controlled copies of the applicable procedures shall be provided to the NRC's Director, Repository Licensing and Quality Assurance Project Directorate or designee.

5. Agency Use of Information

It is understood that information made available to either agency under this agreement may be used at that agency's option in carrying out its responsibilities.

6. Project Specific Agreements

Specific agreements will be developed for each project and site under investigation.

7. Consultations

Nothing in this agreement shall be construed as limiting forms of informal consultation not mentioned in this agreement (for example, telephone conversation or exchanges of reports). These other consultations will be documented in a timely manner.

8. QA Audits and Surveillances

NRC staff, and consistent with security access and safety rules, representatives from affected units of State, local governments, and Indian Tribes, will be permitted to observe DOE QA audits and surveillances. In addition, the NRC may perform audits of DOE and participant QA programs.

Date: May 13, 1993

AGREEMENT BETWEEN THE U.S. DEPARTMENT OF ENERGY OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT AND THE NUCLEAR REGULATORY COMMISSION DIVISION OF HIGH-LEVEL WASTE MANAGEMENT DURING SITE CHARACTERIZATION PROGRAMS AND PRIOR TO THE SUBMITTAL OF AN APPLICATION FOR AUTHORIZATION TO CONSTRUCT A REPOSITORY

This agreement implements, on a repository project-specific basis, the "Procedural Agreement Between the Nuclear Regulatory Commission and the U.S. Department of Energy Identifying Guiding Principles for Interface During Geologic Site Investigation and Site Characterization" (hereafter referred to as the Procedural Agreement) made between the Nuclear Regulatory Commission and the U.S. Department of Energy (DOE), and supersedes all previous project-specific agreement(s) between NRC's Division of High-Level Waste Management (HLWM) and DOE's Office of Civilian Radioactive Waste Management (OCRWM) regarding information exchange and consultation for potential repository sites. This agreement implements Section 6 of the Procedural Agreement which requires that project-specific agreements, tailored to the specific project and reflecting differences in sites and project organizations be negotiated to implement the principles established in the Procedural Agreement. Because this repository project level agreement is drawn to implement the principles set forth in the Procedural Agreement, appendices detailing repository project-specific items will be developed as necessary. These appendices will be updated, added to, or changed as required. Nothing in this agreement shall be construed either to modify the Procedural Agreement in any way or to confer rights on any party other than the parties to these agreements.

1. NRC On-Site Representatives (ORs)

At such time as the NRC ORs are stationed at the site, they are to be provided with office space that is near the DOE project office and site activities. Where such office space can be provided, DOE is to provide such space near the site activities and the NRC is to provide space that can be visited by the public.

The NRC OR shall be afforded access to personnel, project records and facilities at the respective site, research facilities and other contractor and subcontractor areas. Access will be subject to applicable requirements for proper identification and compliance with applicable access control measures for security, radiological protection and personnel safety. DOE will identify, at the time it makes information available to NRC, any records which it considers exempt from public disclosure under the Freedom of Information Act. NRC, following consultation with DOE, will withhold such information from public disclosure to the extent stated in 10 CFR Part 9. Records as used above are defined as all records that would be generally relevant to a potential licensing decision by the Commission. Included in this category are records kept by DOE and DOE contractors and subcontractors accessible to DOE.

Project-specific conditions are discussed in the appendices.

2. Interactions

A. Interactions

Schedules agreed on, pursuant to Section 2g of the Procedural Agreement, for future interactions covering approximately a six month period will be updated at least bi-weekly and made available in the local and headquarters public document rooms (PDRs) of both NRC and DOE. In addition, toll-free telephone services will be operated by DOE headquarters and NRC to announce the meeting schedules. A description of this process for making the schedule of upcoming interactions publicly available will be provided by a DOE annual Federal Register Notice. Representatives from the affected State, units of local governments, and Indian Tribes will be given the opportunity to participate at the interactions. These interactions will be open, with members of the public being permitted to attend as observers, consistent with security access and safety rules.

Dates for major interactions will be agreed to as far in advance as is practicable, with a time frame of six months in advance as the goal. Final agreement as to agenda and participants will both be reached normally a minimum of 10 working days prior to the scheduled date for the meeting and be made available in the PDRs. Deviations from the agreed to agenda will be discussed among all organizations that participate in developing the agenda. Changes will be agreed upon by DOE and NRC. Although both agencies will use their best efforts to provide the indicated lead times, nothing in this section shall be construed as preventing the scheduling of interactions with shorter lead times by mutual agency agreement.

B. Licensing and Management Meetings

As part of the discussion during licensing and management meetings held under Section 2c of the Procedural Agreement, issues related to policy, budget, program scope, commitment of resources and program schedules may be included as appropriate. The procedures established in Section 2A above regarding dissemination of schedules and agendas for the technical interactions will also be used to disseminate schedules and agendas for the licensing and management meetings. Any commitments that are made during the meeting will be documented into formal correspondence by the party(ies) making the commitments.

C. Interaction Reports

The format of the interaction report should include a short introductory paragraph stating the date of the interaction, the organizations that participated, and the purpose. Attached to the minutes should be the list of attendees. In the body, the minutes should describe the presentations made and the discussions held during the interaction. Information presented in the minutes will only report the events that took place during the interaction. Copies of

presentation materials should be included as attachments to the minutes. Copies of materials such as preliminary data, maps, logs, and laboratory books discussed at site visits are not prepared as documentation of the interaction. Documentation may be provided, upon request, to a participant on a site visit in accordance with Section 3a of the Procedural Agreement. Following preparation of the minutes and an informal review within DOE and NRC to assure accuracy, NRC and DOE lead representatives will sign the minutes. An opportunity will be provided for representatives from the State, affected units of local government, and affected Indian Tribes to include in the summary any positions they had taken in the interaction. DOE and NRC will issue interaction reports within 30 days after the interaction. If a jointly approved NRC/DOE interaction report is not issued within 30 days, NRC and DOE may elect to issue an independent record of events of the interaction. Interaction reports will be provided to the State, affected units of local government, affected Indian Tribes, and the NRC and DOE PDRs. NRC will provide the joint reports. If DOE and NRC issue separate reports, each agency will be responsible for providing only its own report.

3. Timely Release of Information

A. Report Inventory

Each agency will develop as soon as practicable and thereafter maintain and exchange an inventory of reports, plans, procedures, and technical positions (products) both completed and in process. This inventory will include descriptions of product scope and purpose as well as the scheduled dates for completion of draft and final products. The inventories will be updated and exchanged at least semi-annually. This will allow each agency to request products from the other.

B. Points of Contact

Respective points of contact for DOE and NRC are defined in appropriate appendices. Either agency may change their points of contact unilaterally with prior notification to the other party. Other organizations within NRC working on the high-level waste repository will use these designated points of contact within NRC's HLWM for interactions with DOE's OCRWM. Details of the information exchange will be determined by DOE requirements and defined in appendices as appropriate.

Telephonic communications covered under Item c in Appendix I are intended solely for the exchange of information and ideas by NRC and DOE personnel involved in the various technical areas relating to the site information program for the potential repository site. Individuals participating in such communications have no authority to present official NRC or DOE positions, or to make official policy statements on behalf of either NRC or DOE.

C. Site Characterization Data for the Potential Repository Site.

To keep the NRC on-site representative informed regarding what data will be forthcoming and when, DOE will notify the on-site representative of the schedule of planned field and laboratory testing covering as long a period as practicable. The representative will also be notified of changes to the test schedule.

DOE will develop, as soon as practicable, and thereafter maintain a catalog of all site characterization data, except those excluded by law. Descriptions of data in the catalog will include: time, place, and method of acquisition; an indication of the scope of the information; and the location where they may be examined. This catalog will be maintained in a computer data base, readily available for read-only access by the NRC, as soon as possible, in a mutually agreed upon electronic format by NRC and DOE. The data catalog will be updated in accordance with DOE procedures. When developed and implemented, revisions to the documentation for access to the data catalog will be provided to NRC as they are made. DOE will revise the data catalog on a quarterly basis and provide NRC with a hard copy or a mutually agreeable electronic format and medium until computer access is available.

Upon NRC request and at a location chosen by DOE, DOE will make data available to NRC for examination. After the quality assurance checks specified in Section 3a of the Procedural Agreement have been completed (which will normally be within 45 days from data acquisition either in the laboratory or in the field), data will be provided to NRC in hard copy format, or in a mutually agreeable electronic format and medium upon request. As site characterization proceeds, DOE may find it advantageous to maintain electronic data bases containing basic processed data. As these data bases become available on-line to the participants, the NRC will be allowed on-line, read-only¹ computer access to these systems provided that all questions of security, and comparable access to the State and the public can be resolved in a manner that protects the integrity of the system.

Because of the preliminary nature of these data, all such data placed in the PDR will carry the following caveat: "QA checks on data contained here have only been performed to determine that the data have been obtained and documented properly. DOE cautions that any information is incomplete and preliminary. This information is subject to change as a more representative data base is accumulated. Any analyses and interpretations should be made accordingly."

¹ "read-only" means that the data file can be read, copied, and down-loaded (ie., the copied portion of the file can be electronically transmitted to another file for the reader's use), but that no manipulation or changes to the original master data file can be performed by the reader.

NRC will also notify DOE of its schedule (and those of its contractors) of planned field and laboratory testing conducted at or with samples from the potential repository site and will establish, maintain, update, and provide to DOE an inventory of, and access to, data as described in the preceding paragraphs.

Upon request by NRC or DOE, either party will provide the other a controlled copy(ies) of any specially developed or modified computer programs (including programming within commercially available software and associated linking programs or programs passing data) used in making site characterization analyses, performance assessments, design analyses, and design drawings, subject to resolution of proprietary, privileged, or licensing concerns. Such programs will be available to NRC or DOE upon citation in a programmatic document (i.e., documents published by either party). Each party must maintain this software under its own appropriate software configuration management controls. Such programs will be provided in a mutually agreed upon electronic medium. Each party will provide relevant specifications for use of requested software; however, each party will be responsible for acquisition and maintenance of the commercially available software and/or hardware needed to run the programs requested. Each party will pay for any respective licensing and maintenance costs associated with such hardware and/or software.

4. Samples

In accordance with Appendix 2, DOE will provide NRC with samples.

5. Terms of Agreement

The terms of this agreement may be amended at any time by mutual consent, in writing.

6. Effective Date

This agreement shall enter into force on the latter date of signature by the parties.

c. Telephonic Communications

Formal transmittal of technical information to the NRC shall be through the Office of Systems and Compliance. The points of contact for informal, technical communications (eg., telephone calls) are listed below:

AREA	NRC	DOE
Quality Assurance	Quality Assurance Section Leader or designee	Director, Yucca Mountain Quality Assurance Division
Performance Assessment	Repository Performance Assessment Section Leader or designee	Chief, Technical Analysis Branch
Waste Package	Materials Engineering Section Leader or designee	Chief, Field Engineering Branch
Geologic Repository Operations Area	Geotechnical Engineering Section Leader or designee	Chief, Field Engineering Branch
Exploratory Studies Facility	Geotechnical Engineering Section Leader or designee	Chief, Exploratory Studies Facility Branch
Geology	Geology-Geophysics Section Leader or designee	Chief, Site Investigations Branch
Hydrology	Hydrologic Transport Section Leader or designee	Chief, Site Investigations Branch
Geochemistry	Hydrologic Transport Section Leader or designee	Chief, Site Investigations Branch

d. NRC On-site Representative (OR)

Communications and interactions between the NRC OR and DOE are discussed in Appendix 7.

Appendix 2

ACQUISITION OF SAMPLES DURING SITE CHARACTERIZATION ACTIVITIES BY NRC CONTRACTORS

Requests for collection of samples (e.g., geologic, simulated glass, concrete, steel, water, air, plants, animals, etc.), with NRC-supplied specifications and for which a process of acquisition is not specified in a Yucca Mountain Project Office (YMPO) Administrative or Branch Technical Procedure, are recognized by DOE as legitimate. Upon review and acceptance of the request, DOE will arrange for NRC to receive such requested materials in response to a written request. DOE may request NRC, on a case-by-case basis, to reevaluate the amount of sample material requested in light of the needs of the site characterization program and the availability of samples. DOE will prepare NRC-specified samples for transport.

Controlled copies of all applicable YMPO Samples Acquisition and Handling Procedures will be provided to the NRC's Director, Repository Licensing and Quality Assurance Project Directorate, Division of High-Level Waste Management or designee. The NRC will use these procedures to request samples from DOE, which are being obtained as part of the site characterization program.

Appendices 3 - 6 Reserved

Appendix 7

AGREEMENT CONCERNING THE NUCLEAR REGULATORY COMMISSION ON-SITE REPRESENTATIVE FOR THE REPOSITORY PROJECTS DURING SITE CHARACTERIZATION

The purpose and objective of the on-site representative (OR), as identified in Section 1 of the Procedural Agreement, is to serve as a point of prompt informational exchange and consultation and to preliminarily identify concerns about investigations relating to potential licensing issues.

This appendix is intended to supplement the base agreement and to detail the guidelines which will govern interaction between the NRC OR, including any NRC personnel assigned to the OR, and DOE contractor personnel (prime and sub) through the project's Regulatory Interactions Branch of the Regulatory and Site Evaluation Division. Any interactions between the OR and DOE, its contractors, or subcontractors identified in this appendix will not constitute interactions within the intent of Section 2 of the Procedural Agreement and therefore will not require the preparation of written reports and will not be subject to State/Tribal and public notification and participation or schedule requirements of Section 2 of the Procedural Agreement. The interactions of the OR with DOE and its contractors and subcontractors are not intended to interfere with or replace other channels of NRC/DOE communications and procedures for information release identified in Sections 2, 3A, and 3B of the this agreement and Sections 2, 3, 7, and 8 of the Procedural Agreement.

The following points are agreed to:

1. The OR can attend any meetings on-site or off-site dealing with technical questions or issues related to work required as part of site characterization (e.g., any items to be covered in Site Characterization Plans under the Nuclear Waste Policy Act, as amended) following notification of the cognizant DOE project representative responsible for the meeting as discussed below. Such notification shall be by memorandum, telephone or personal contact and will be given at least 24 hours in advance where DOE has provided adequate prior notification to the OR. The meetings may involve solely DOE or solely DOE's contractors (prime and sub), or any combination of DOE with their contractors.

If objections to the OR attendance are voiced for any reason, the reason should be specified. Such objections will be infrequent and will be exceptions to the rule. If the OR does not agree with DOE objections, it will be raised to a higher management level for resolution. If resolution cannot be achieved, the OR will not attend the meeting in question.

2. The OR may communicate orally (in person or by phone) with persons employed by DOE, DOE's prime contractors or the prime's subcontractor, (on-site or off-site), providing that the following procedures are followed. If practicable, the OR will arrange for all individual sessions with prime contractor and subcontractor staff by contacting the DOE YMPO Regulatory Interactions Branch Chief or designated DOE staff member. If they cannot be contacted, the OR will attempt to contact the proper prime contractor, section, or department manager. As a minimum, the OR will give timely notification of all such sessions to DOE and the affected

contractor or participant(s) management as soon as possible. The OR will avoid discussions with personnel when it would appear to disrupt important duties and will seek to schedule meetings at a mutually convenient time. It is at the option of DOE, in consultation with participant management, as to whether or not a staff member, supervisor, or third party is to be present. No record of such discussions is required; however, questions that are raised or other issues that arise as a result of these interactions will be reported by the participant to the YMPO Regulatory Interactions Branch Chief, or the NRC Repository Licensing and Quality Assurance Project Directorate, as appropriate.

When NRC headquarters staff is temporarily assigned to the OR office, the NRC Director, Repository Licensing and Quality Assurance Project Directorate, or designee, will notify DOE's Chief of the Regulatory Integration Branch of the reassignment at least one week prior to the reassignment.

3. The DOE project office, DOE prime contractors, and their subcontractors will provide the OR access to records which would be generally relevant to a potential licensing decision by the Commission as follows. Upon request by the OR, DOE or the DOE contractor or subcontractor shall provide:
1) copies of any records of data; 2) records which document the analyses, evaluations, or reduction of data; or 3) records which contain information deduced by reason. These records will be made available to the OR, after the documentation has been reviewed and approved in accordance with the appropriate project office administrative procedure. Records that have not been reviewed and approved by the project office shall be made available for viewing, but not to copy or to retain, at any stage of completion. Requests by the OR for release of such records shall be made through and authorized by the YMPO Regulatory Interactions Branch Chief or staff.
4. Copies of pre-decisional and preliminary drafts of documents required by the Nuclear Waste Policy Act of 1982 as amended, or related to prelicensing activities, which have not been approved by DOE, will not be provided to the OR without DOE approval. Documents of this type may be made available by authorized DOE personnel, for review in DOE or DOE contractor offices. Such documents may not be authorized as available by a DOE contractor alone. Any such documents made available are for the use of the OR and shall not be placed in any NRC public document room.
5. The OR does not have the authority to direct DOE, its contractors or subcontractors to perform any work. Any formal identification of questions or issues for investigation by DOE that could result in contractor or subcontractor work must be formally presented to DOE through the NRC Repository Licensing and Quality Assurance Project Directorate in writing.
6. The OR will attend on-site meetings upon request by the DOE project office or prime contractor on-site whenever possible. The OR will provide any records which would normally be available under 10 CFR Part 2.790 of the

Commission's regulations to project participants upon request to copy. If convenient, copies of such records will be provided by the OR.

7. The OR shall be afforded access to the site, research facilities, and other contractor and subcontractor areas to observe testing or other data gathering activities, in progress, as part of site characterization subject to compliance with the applicable requirements for identification, and applicable access control measures for security, radiological protection and personnel safety, provided that such access shall not interfere with the activities being conducted by DOE or its contractors and that any discussions conducted during such access shall comply with Point 2 above.

Such access shall be allowed as rapidly as it is for DOE or DOE contractor employees upon display of an appropriate access identification badge, or, if badging is not possible for national security reasons, upon prior notification to DOE or cognizant contractor supervisory personnel (by memorandum, telephone, or personal contact). When an access identification badge is available to DOE or DOE's contractors and subcontractors on a routine basis, it shall be made available to the OR upon completion of the required security clearances and appropriate radiological and personnel safety training. DOE will ensure that any training required is provided to the OR.

8. NRC can videotape or photograph any inanimate objects or geologic features associated with site characterization activities at the Yucca Mountain Site consistent with Nevada test site security. Additionally, upon request from the OR, DOE will provide NRC videotape footage of personnel performing site characterization activities. If requested, the OR and other NRC staff will be permitted to accompany DOE during the videotaping.
9. DOE YMPO may provide, to the NRC OR, the information required to execute DOE responsibilities under Appendix 7 of this agreement by informal note, by telephone, or by personal contact. Such communications shall adhere to the procedures for communication and information release specified elsewhere in the Procedural Agreement and this agreement.

ENCLOSURE 2

PROCEDURAL AGREEMENT BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION AND THE U.S. DEPARTMENT OF ENERGY IDENTIFYING GUIDING PRINCIPLES FOR INTERFACE DURING [GEOLOGIC REPOSITORY] SITE INVESTIGATION AND SITE CHARACTERIZATION

This Procedural Agreement outlines procedures for staff consultation and exchange of information which the [Nuclear Regulatory] Commission (NRC) and the [U.S.] Department of Energy (DOE) [and its designated contractors] will observe in connection with the characterization of sites for a geologic repository under the Nuclear Waste Policy Act of 1982, [as amended (NWPA)]. The purpose of these procedures is to assure that an information flow is maintained between the two agencies which will facilitate the accomplishment by each agency of its responsibilities relative to site investigation and characterization under the ~~Nuclear Waste Policy Act~~ [NWPA]. The agreement is to assure that NRC receives adequate information on a timely basis to enable NRC to review, evaluate, and comment on those DOE activities of regulatory interest in accordance with DOE's project decision schedule and thereby facilitate early identification of potential licensing issues for timely staff resolution. The agreement is to assure that DOE has prompt access to NRC for discussions and explanations relative to the intent, meaning and purpose of NRC comments and evaluations of DOE activities and so that DOE can be aware, on a current basis, of the status of NRC actions relative to DOE activities.

This Procedural Agreement shall be subject to the provisions of any project decision schedule, [or any schedules specifically related thereto,] that may hereafter be established by DOE, and any regulations that may hereafter be adopted by NRC, pursuant to law. In particular, nothing herein shall be construed to limit the authority of the Commission to require the submission of information as part of a general plan for site characterization activities to be conducted at a candidate site or the submission of reports on the nature and extent of site characterization activities at a candidate site and the information developed from such activities. [In accordance with 10 CFR 60.18(1), no action taken pursuant to this agreement shall be deemed to constitute a commitment to issue any authorization or license, or in any way affect the authority of the Commission, its officers, and staff, in any licensing proceeding.]

1. NRC On-Site Representatives

As early as practicable following area phase field work, NRC on-site representatives will be stationed at each [any] site undergoing investigation principally to serve as a point of prompt informational exchange and consultation and to preliminarily identify concerns about such investigations relating to potential licensing issues.

2. Meetings [Interactions]

From the time this agreement is entered into, and for so long as site characterization activities are being planned or are in progress, DOE and NRC will schedule and hold meetings [interactions] periodically as provided in this section. [Interactions are classified as technical meetings, technical exchanges, site visits, or licensing and management meetings.] A written report agreed to by both DOE and NRC will be prepared for each meeting [interaction.] ~~including agreements reached.~~

- a. Technical meetings will be held between DOE and NRC technical [//licensing] staff to: review and consult on interpretations of data; identify potential licensing issues; agree upon the sufficiency of available information and data; and agree upon methods and approaches for the acquisition of additional information and data as needed to facilitate NRC reviews and evaluations and for staff resolution of such potential licensing issues. [Technical meetings may be a forum for the expression of technical/regulatory policy, negotiation of commitments and an agreement on the acceptability of actions on the part of both agencies.]
- [b.] [Technical exchanges will be held between DOE and NRC technical [//licensing] staff to: discuss a specific technical and/or regulatory topic within their areas of expertise (e.g., geology, hydrology, seismology, waste package design, repository design). The primary purpose of a technical exchange is to promote a better mutual understanding of the topic prior to an officially established technical or regulatory position. For example, a discussion of the mechanism of a process, the occurrence of a particular event, or the technical aspects of regulatory interpretations is appropriate for discussion during a technical exchange. Technical exchanges will not be used as a forum to officially establish or change technical and/or regulatory positions, or extract commitments, or agree to courses of action.]
- [c.] [Site visits will be held between DOE and NRC technical staff to: explain technical information related to ongoing field or laboratory site characterization activities; and visit locations at the site for field briefings and discussions of preliminary data and interpretation derived from ongoing work. The primary purpose of a site visit is for both organizations to benefit from discussion of technical topics in the field. The itinerary for site visits will be developed and noticed similar to a technical exchange agenda. The documentation requirements for the proceedings of site visits are not the same as for a technical exchange, due to the formative nature of preliminary data and interpretations. Site visits will not be used as a forum to officially establish or change technical and/or regulatory positions, establish commitments, nor agree to courses of action. Proceedings covered by Appendix 7 of the "Agreement Between the U.S. Department of Energy Office of Civilian Radioactive Waste Management and the Nuclear Regulatory Commission Division of High-Level Waste Management During Site Characterization Programs and Prior to the Submittal of an Application for Authorization to Construct a Repository" (hereafter referred to as the Repository Project-Specific Agreement) do not apply to site visits.]
- b-[d.] ~~Periodic~~ [Licensing and] management meetings will be [held] ~~at the site specific project level~~ whenever necessary, but at least [semi-annually], ~~quarterly~~, to review the summary results of the technical meetings [interactions]; to review the status of outstanding concerns and issues; [to] discuss plans for resolution of outstanding items and

issues; to update the schedule of technical meetings and other actions needed for staff resolution of open items regarding site characterization programs; and to consult on what generic guidance is advisable and necessary for NRC to prepare. Unresolved management issues will be promptly elevated to upper management for resolution. [Licensing and management meetings are conducted to discuss major nontechnical issues related to program policy, schedules, scope, and major commitment of resources. Any commitments that are made during the meeting will be documented into formal correspondence by the party(ies) making the commitments.]

- e-[e.] Early ~~technical meetings~~ [interactions] will be scheduled [as needed] to discuss written NRC comments on DOE documents such as ~~Site Characterization~~ [Study] Plans, DOE's semi-annual progress reports, and technical reports to foster a mutual understanding of comments and the information or activities needed for staff resolution of the comments.
- d-[f.] In formulating plans for activities which DOE will undertake to develop information needed for staff resolution of potential licensing issues, DOE will meet with NRC to provide an overview of the plans so that NRC can comment on their sufficiency. These discussions will be held sufficiently early so that any changes that NRC comments may entail can be duly considered by DOE in a manner not to delay DOE activities.
- e-[g.] Schedules of activities pertaining to ~~technical meetings~~ [interactions] will be made publicly available. Potential host States, [affected units of local government,] and affected Indian Tribes will be notified and invited to attend ~~technical meetings~~ [interactions] covered in this section (Section 2, ~~Meetings~~ [Interactions]). The notification will be given on a timely basis by ~~the DOE~~ [NRC ten working days prior to the interaction, where possible]. These ~~technical meetings~~ [interactions] will be open, ~~meetings~~ with members of the public being permitted to attend as observers.

3. Timely Release of Information

- a. Data collected during site investigations will be made available to NRC on a current, continuing basis after ~~the DOE~~ (or DOE contractor) ~~quality assurance~~ [performs internal] checks that are inherent in determining that the data ~~has~~ [were] obtained and documented properly, [in accordance with applicable quality assurance requirements and procedures.]
- b. DOE's analyses and evaluations of data will be made available to NRC in a timely manner.

[c.] [DOE will provide, in a timely manner to NRC, controlled copies of any specially developed computer programs used in making site characterization analyses, performance assessments, or design analyses.]

4. Site Specific Samples

[In accordance] ~~Consistent~~ with [Appendix 2, "Acquisition of Samples During Site Characterization Activities by NRC Contractors," of] the Repository Project-Specific Agreement and applicable [DOE controlled administrative] ~~mutually agreed on~~ procedures, DOE will provide NRC with ~~site specific~~ samples to be used by NRC for independent analysis and evaluation. [Controlled copies of the applicable procedures shall be provided to the NRC's Director, Repository Licensing and Quality Assurance Project Directorate or designee.]

5. Agency Use of Information

It is understood that information made available to either agency under this agreement may be used at that agency's option in carrying out its responsibilities.

6. Project Specific Agreements

~~Project specific agreements to implement the above principles will be negotiated within 120 days of the time this agreement is entered into. These project specific agreements will be tailored to the specific projects to reflect the differences in sites and project organizations.~~

[Specific agreements will be developed for each project and site under investigation.]

7. [Consultations]

Nothing in this agreement shall be construed as limiting forms of informal consultation not mentioned in this agreement (for example, telephone conversation or exchanges of reports). These other consultations will be documented in a timely manner.

[8.][QA Audits and Surveillances]

[NRC staff, and consistent with security access and safety rules, representatives from affected units of State, local governments, and Indian Tribes, will be permitted to observe DOE QA audits and surveillances. In addition, the NRC may perform audits of DOE and participant QA programs.]

Date: _____

AGREEMENT BETWEEN THE [U.S.] DEPARTMENT OF ENERGY'S OFFICE OF GEOLOGIC REPOSITORIES PROJECTS (~~BWIP, NNWSI, SRP, GRP~~) [CIVILIAN RADIOACTIVE WASTE MANAGEMENT] AND THE NUCLEAR REGULATORY COMMISSION'S DIVISION OF [HIGH-LEVEL] WASTE MANAGEMENT DURING THE SITE INVESTIGATION AND CHARACTERIZATION PROGRAMS AND PRIOR TO THE SUBMITTAL OF AN APPLICATION FOR AUTHORIZATION TO CONSTRUCT A REPOSITORY

This agreement implements, on a [repository] project-specific basis, the "Procedural Agreement [Between the Nuclear Regulatory Commission and the U.S. Department of Energy Identifying Guiding Principles for Interface During Geologic Dite Investigation and Site Characterization" (hereafter referred to as the Procedural Agreement)] made between the [Nuclear Regulatory] Commission and the [U.S.] Department [of Energy] (DOE), and supersedes all previous project-specific agreement(s) between NRC's Division of [High-Level] Waste Management [(HLWM)] and DOE's Office of Geologic Repositories [Civilian Radioactive Waste Management (OCRWM)] regarding information exchange and consultation for potential repository sites. This agreement implements Section 6 of the DOE/NRC Procedural Agreement which requires that project-specific agreements, tailored to the specific project and reflecting differences in sites and project organizations be negotiated to implement the principles established in the Procedural Agreement. Because this [repository] project level agreement is drawn to implement the principles set forth in the Procedural Agreement, appendices detailing [repository] project-specific items [will be developed] as necessary ~~are attached~~. These appendices will be updated, added to, or changed as required. Nothing in this agreement shall be construed either to modify the Procedural Agreement in any way or to confer rights on any party other than the parties to these agreements.

1. NRC On-Site Representatives (ORs)

At such time as the NRC ORs are stationed at [the] each site, they are to be provided with office space that ~~can be readily visited by members of the public and is near the DOE project office and site activities (where Project Office and site activities are not convenient to one another, two separate offices will be provided)~~. Where such office space can be provided, ~~in DOE facilities, DOE is to provide such space otherwise, the DOE is to provide space in its facilities near the Project Offices and site activities and the NRC is to provide space that can be visited by the public.~~

The NRC OR shall be afforded access to personnel, project records and facilities at the respective site, ~~geologic repository operations area and adjacent areas~~, research facilities and other contractor and subcontractor areas. Access will be subject to applicable requirements for proper identification and compliance with applicable access control measures for security, radiological protection and personnel safety. [DOE will identify, at the time it makes information available to NRC, any records which it considers exempt from public disclosure under the Freedom of Information Act. NRC, following consultation with DOE, will withhold such information from public disclosure to the extent stated in 10 CFR Part 9.] Records as used above ~~shall include~~ [are defined as] all records that would be

generally relevant to a potential licensing decision by the Commission. Included in this category are records kept by DOE and DOE contractors and subcontractors accessible to DOE.

Project-specific conditions are discussed in the appendices.

2. Meetings [Interactions]

A. ~~Technical Meetings~~ [Interactions]

Schedules agreed on, pursuant to Section 2e[g] of the Procedural Agreement, for future [interactions] meetings covering approximately a ~~three~~ [six] month period will be updated at least [bi-]weekly and ~~posted prominently~~ [made available] in the local and headquarters public document rooms (PDRs) of both ~~the~~ NRC and ~~the~~ DOE. In addition, toll-free telephone service[s] will be operated by DOE headquarters [and NRC] to announce the meeting schedules. A description of this process for making the schedule of upcoming [interactions] meetings publicly available will be provided by a DOE annual Federal Register Notice. ~~Affected State/tribal representatives~~ [Representatives from the affected State, units of local governments, and Indian Tribes] and will be given the opportunity to participate at the ~~technical meetings~~ [interactions]. [These interactions will be open, with members of the public being permitted to attend as observers, consistent with security access and safety rules.]

Dates for major ~~technical meetings~~ [interactions] will be agreed to as far in advance as is practicable, with a ~~goal~~ [time frame] of ~~four~~ [six] months in advance [as the goal]. Final agreement as to agenda and participants will both be reached normally a minimum of 10 working days prior to the scheduled date for the meeting and be ~~posted~~ [made available] in the PDRs. Deviations from the agreed to agenda [will be discussed among all] ~~are permitted upon agreement of NRC, and the cognizant DOE, Project Office and~~ [organizations that participate in developing the agenda. Changes will be agreed upon by DOE and NRC.] Although both agencies will use their best efforts to provide the indicated lead times, nothing in this section shall be construed as preventing the scheduling of ~~technical meetings~~ [interactions] with shorter lead times by mutual [agency] agreement. ~~The host agency has the responsibility for organizing and conducting technical meetings.~~

B. [Licensing and] Management Meetings

As part of the discussion during [licensing and] management meetings held under Section 2b[c] of the Procedural Agreement, issues related to policy, budget, program scope, commitment of resources and program schedules may be included as appropriate. ~~The host agency has the responsibility for organizing and conducting management meetings.~~ The procedures established in Section 2A above regarding dissemination of schedules and agendas for the technical meetings [interactions] will also be used to disseminate schedules and agendas for the [licensing

and] management meetings. [Any commitments that are made during the meeting will be documented into formal correspondence by the party(ies) making the commitments.]

C. Meeting [Interaction] Reports

~~A meeting report containing a summary of important observations and issues discussed at meetings will be jointly prepared by DOE and NRC for the Technical and Management meetings discussed above, and signed or initialed by representatives of both agencies at the conclusion of each meeting. [The format of the interaction report should include a short introductory paragraph stating the date of the interaction, the organizations that participated, and the purpose. Attached to the minutes should be the list of attendees. In the body, the minutes should describe the presentations made and the discussions held during the interaction. Information presented in the minutes will only report the events that took place during the interaction. Copies of presentation materials should be included as attachments to the minutes. Copies of materials such as preliminary data, maps, logs, and laboratory books discussed at site visits are not prepared as documentation of the interaction. Documentation may be provided, upon request, to a participant on a site visit in accordance with Section 3a of the Procedural Agreement. Following preparation of the minutes and an informal review within DOE and NRC to assure accuracy, NRC and DOE lead representatives will sign the minutes.] An opportunity will be provided for State/affected tribal representatives [from the State, affected units of local government, and affected Indian Tribes to include in the summary any positions they had taken in the interaction.] add their comments and observations to and initial the meeting summary. A standard format shown in Appendix 6 will be used in the preparation of meeting reports. The DOE [and NRC] will issue [interaction] meeting reports within two weeks [thirty days] after the [interaction] meeting. [If a jointly approved NRC/DOE interaction report is not issued within 30 days, NRC and DOE may elect to issue an independent record of events of the interaction.] The DOE will also provide the meeting reports to the affected States, Indian Tribes, and its PDRs. The NRC will distribute meeting reports to its PDRs. [Interaction reports will be provided to the State, affected units of local government, affected Indian Tribes, and the NRC and DOE PDRs. NRC will provide the joint reports. If DOE and NRC issue separate reports, each agency will be responsible for providing only its own report.]~~

3. Timely Release of Information

A. Report Inventory

Each agency will develop as soon as practicable and thereafter maintain and exchange an inventory of reports, plans, procedures, and technical positions (products) both completed and in process. This inventory will include descriptions of product scope and purpose as well as the scheduled dates for completion of draft and final

products. The inventories will be updated and exchanged at least quarterly [semi-annually.] This will allow each agency to request products from the other. ~~and thereby influence priorities for release.~~

B. Points of Contact

Respective points of contact for the individual DOE project and the NRC are defined in [appropriate appendices] ~~the appendix.~~ Either agency may change their points of contact unilaterally with prior notification to the other party. Other organizations within the NRC [working on the high-level waste repository] will ~~work through~~ [use] these designated points of contact within the NRC's ~~Division of Waste Management [HLWM] for interactions with the DOE's Office of Geologic Repositories Projects [OCRWM].~~ Details of the information exchange will be determined by ~~the individual project [DOE] requirements and defined in the [appendices] appendix~~ as appropriate.

~~Technical~~ [Telephonic] communications [covered under Item c in Appendix 1] are intended solely for the exchange of information and ideas by NRC and DOE personnel involved in the various technical areas relating to the site information program for [the] potential repository site. Individuals participating in such communications have no authority to present official NRC or DOE positions, or to make official policy statements on behalf of either NRC or DOE.

C. ~~Site Investigation and~~ Site Characterization Data for [the] Potential Repository Site.

To keep the NRC on-site representative informed regarding what data will be forthcoming and when, DOE will notify the [on-site] representative of the schedule of planned field and laboratory testing covering as long a period as practicable. The representative will also be notified of changes to the test schedule. ~~The schedule and any notification of changes to the schedule will also be provided to the cognizant NRC Repository Project Branch Section Leader. (see Appendices 1-4).~~

The DOE will develop, as soon as practicable, and thereafter maintain a catalog of [all site characterization] data, [except those excluded by law]. Descriptions of data in the catalog will include: time, place, and method of acquisition; [an indication of the scope of the information]; and [the location] where they may be examined. This catalog will be ~~updated and provided to NRC at least quarterly~~ [maintained in a computer data base, readily available for read-only access by the NRC, as soon as possible, in a mutually agreed upon electronic format by NRC and DOE. The data catalog will be updated in accordance with DOE procedures. When developed and implemented, revisions to the documentation for access to the data catalog will be provided to NRC as they are made. DOE will revise the data catalog on a quarterly basis and provide NRC with a hard copy or a mutually agreeable electronic format and medium until computer access is

available.]

Upon NRC request and at a location chosen by the DOE, the DOE will make data available to the NRC for examination. After the quality assurance checks specified in Section 3a of the Procedural Agreement have been completed [(which will normally be within 45 days from data acquisition either in the laboratory or in the field)], data will be provided to the NRC in hard copy format, [or in a mutually agreeable electronic format and medium] upon request. [As site characterization proceeds, DOE may find it advantageous to maintain electronic data bases containing basic processed data. As these data bases become available online to the participants, the NRC will be allowed on-line, read-only¹] computer access to these systems provided that all questions of security, and comparable access to the State and the public can be resolved in a manner that protects the integrity of the system.]

Because of the preliminary nature of these data, all such data placed in the PDR will carry the following caveat: "QA checks on data contained here have only been performed to determine that the data has been obtained and documented properly. The DOE cautions that any information is [incomplete and] preliminary. [This information is] subject to change as ~~further analyses are performed or as an enlarged and perhaps~~ [as a] more representative data base is accumulated. ~~These data and~~ [Any analyses and] interpretations should be used [made] accordingly."

The NRC will also notify the DOE of its schedule (and those of its contractors) of planned field and laboratory testing conducted at or with samples from [the] potential repository sites and will establish, maintain, update, and provide to the DOE an inventory of, [and access to,] data as described in the preceding paragraph[s].

[Upon request by NRC or DOE, either party will provide the other a controlled copy(ies) of any specially developed or modified computer programs (including programming within commercially available software and associated linking programs or programs passing data) used in making site characterization analyses, performance assessments, design analyses, and design drawings, subject to resolution of proprietary, privileged, or licensing concerns. Such programs will be available to NRC or DOE upon citation in a programmatic document (i.e., documents published by either party). Each party must maintain this software under its own appropriate software configuration management controls. Such programs will be provided in a mutually agreed upon electronic medium. Each party will provide relevant specifications for use of requested software; however, each party will be responsible for

¹ ["read-only" means that the data file can be read, copied, and downloaded (i.e., the copied portion of the file can be electronically transmitted to another file for the reader's use), but that no manipulation or changes to the original master data file can be performed by the reader.]

acquisition and maintenance of the commercially available software and/or hardware needed to run the programs requested. Each party will pay for any respective licensing and maintenance costs associated with such hardware and/or software.]

4. Site Specific Samples

[In accordance] ~~Consistent with the specified in Appendix [2], the DOE will provide the NRC with site-specific samples.~~

5. Terms of Agreement

The terms of this agreement ~~will be reviewed annually and may be amended at any time by mutual consent, in writing.~~

6. Effective Date

This agreement shall enter into force on the latter date of signature by the parties.

[Communications and interactions between the NRC OR and DOE are discussed in Appendix 7.]

Appendix [2] 5

ACQUISITION OF ~~SITE-SPECIFIC~~ SAMPLES DURING ~~SITE INVESTIGATION~~ AND SITE CHARACTERIZATION [ACTIVITIES] BY NRC CONTRACTORS

[Requests for collection of samples (e.g., geologic, simulated glass, concrete, steel, water, air, plants, animals, etc.), with NRC-supplied specifications and for which a process of acquisition is not specified in a Yucca Mountain Project Office (YMPO) Administrative or Branch Technical Procedure, are recognized by DOE as legitimate. Upon review and acceptance of the request, DOE will arrange for NRC to receive such requested materials in response to a written request. DOE may request NRC, on a case-by-case basis, to reevaluate the amount of sample material requested in light of the needs of the site characterization program and the availability of samples. DOE will prepare NRC-specified samples for transport.]

[Controlled copies of all applicable YMPO Samples Acquisition and Handling Procedures will be provided to the NRC's Director, Repository Licensing and Quality Assurance Project Directorate, Division of High-Level Waste Management or designee. The NRC will use these procedures to request samples from DOE, which are being obtained as part of the site characterization program.]

[Appendices 3 - 6 Reserved]

Appendix 7

AGREEMENT CONCERNING THE [NUCLEAR REGULATORY COMMISSION] ON-SITE REPRESENTATIVE ~~(OR)~~ FOR THE REPOSITORY PROJECTS DURING SITE INVESTIGATION AND CHARACTERIZATION

The purpose and objective of the on-site representative (OR), as identified in ~~Item~~ [Section] 1 of the Procedural Agreement, is to serve as a point of prompt informational exchange and consultation and to preliminarily identify concerns about investigations relating to potential licensing issues.

This appendix is intended to supplement the base agreement and to detail the guidelines which will govern interaction between the NRC OR, including any NRC personnel assigned to the OR, and DOE contractor personnel (prime and sub) [through the project's Regulatory Interactions Branch of the Regulatory and Site Evaluation Division.] ~~involved in the project.~~ Any interactions between the OR and DOE, its contractors, or subcontractors identified in this appendix will not constitute "meetings" [interactions] within the intent of ~~item~~ [Section] 2 of the Procedural Agreement, and therefore will not require the preparation of written reports and will not be subject to State/Tribal and public notification and participation or schedule requirements of ~~item~~ [Section] 2 of the Procedural Agreement. The interactions of the OR with DOE and its contractors and subcontractors are not intended to interfere with or replace other channels of NRC/DOE communications and procedures for information release identified in Sections 2, 3A, and 3B of ~~the base~~ [this] agreement and Sections 2, 3, 7, and [8] of the Procedural Agreement.

The following points are agreed to:

1. The OR can attend any meetings on-site or off-site dealing with technical questions or issues related to work required as part of site characterization and ~~site investigation~~ (e.g., any items to be covered in Site Characterization Plans under the Nuclear Waste Policy Act, [as amended]) following notification of the cognizant DOE project representative responsible for the meeting as discussed below. Such notification shall be by memorandum, telephone or personal contact and will be given at least 24 hours in advance where DOE has provided adequate prior notification to the OR. The meetings may involve solely DOE or solely DOE's contractors (prime and sub), or any combination of DOE with their contractors.

If objections to the OR attendance are voiced for any reason, the reason should be specified. Such objections will be infrequent and will be exceptions to the rule. If the OR does not agree with [DOE] ~~the~~ objections, ~~to his attendance~~, it will be raised to a higher management level for resolution. If resolution cannot be achieved, the OR will not attend the meeting in question.

2. The OR may communicate orally (in person or by phone) with ~~the project participants~~ persons employed by DOE, DOE's prime contractors or the prime's subcontractor, (on-site or off-site), providing that the following procedures are followed. If practicable, the OR ~~shall~~ [will] arrange for all individual sessions with prime contractor and subcontractor staff by

contacting first the DOE [YMPO Regulatory Interactions Branch Chief or designated DOE staff member.] and ~~DOE contractor personnel identified in Appendix 1, 2 and 3 of the base agreement, or~~ If they cannot be contacted, [the OR will attempt to contact] the proper prime contractor, section, or department manager. ~~or proper DOE Team Leader.~~ As a minimum, the OR will give timely notification of all such sessions to [DOE and the affected contractor or participant(s) management as soon as possible.] ~~the above individuals.~~ The OR will avoid discussions with personnel when it would appear to disrupt their normal [important] duties and will [seek to] schedule [meetings] a ~~discussion period~~ at a mutually convenient time. ~~The OR will keep DOE or cognizant DOE prime contractor supervisory personnel informed near term (approximately 1 week) areas for intended review and the project participants who may be contacted.~~ It is [at] the option of DOE, [in consultation with participant management,] ~~or the person contacted by the OR as to whether or not a [staff member,] supervisor, or third party is to be present.~~ No record of these [such] discussions is required; however, questions that are raised or other issues that arise as a result of the ~~above [these]~~ interactions will be reported [by the participant] to the [YMPO Regulatory Interactions Branch Chief, or the NRC Repository Licensing and Quality Assurance Project Directorate, as appropriate.] ~~NRC Division of Waste Management and to the cognizant DOE project personnel by the OR as soon as practical.~~

[When NRC headquarters staff is temporarily assigned to the OR office, the NRC Director, Repository Licensing and Quality Assurance Project Directorate, or designee, will notify DOE's Chief of the Regulatory Integration Branch of the reassignment at least one week prior to the reassignment.]

3. [The] DOE project office(s), DOE prime contractors, and their subcontractors will provide the OR access to records which would be generally relevant to a potential licensing decision by the Commission as follows. Upon request by the OR, ~~the~~ DOE or the DOE contractor or subcontractor shall provide: [1]) copies of any records of raw data; ~~provided that the quality assurance checks specified in section 3.a of the Procedural Agreement have been performed.~~ [2]) records which document the analyses, evaluations, or reduction of raw data; or [3]) [records which] contain information deduced by reason. [These records] which will be made available to the OR, after the documentation has been [reviewed and approved in accordance with the appropriate project office administrative procedure.] ~~peer reviewed by the prime contractor, and cleared and approved by DOE.~~ Records [that have not been reviewed and approved by the project office] shall be [made] available for viewing, but not to copy or to ~~receive a copy for retention [retain],~~ at any stage of completion. [Requests by the OR for release of such records shall be made through and authorized by the YMPO Regulatory Interactions Branch Chief or staff.]
4. [Copies of predecisional and preliminary] drafts of documents required by the Nuclear Waste Policy Act of 1982 [as amended], [or related to prelicensing activities], ~~such as the EA, and SCP~~ which have not been approved by DOE, will not be provided to the OR without DOE approval. Documents of this type may be made available by [authorized] DOE

[personnel], ~~but not the DOE contractor~~, [for review in DOE or DOE contractor offices. Such documents may not be authorized as available by a DOE contractor alone.] Any such documents made available are for the use of the OR and shall not be placed in any NRC public document room.

5. The OR does not have the authority to direct DOE, ~~their~~ [its] contractors or subcontractors to perform any work. Any formal identification of questions or issues for investigation by DOE that could result in contractor or subcontractor work must be formally presented to DOE through the ~~NRC Division of Waste Management~~ [Repository Licensing and Quality Assurance Project Directorate] in writing.
6. The OR will attend on-site meetings upon request by the DOE project office or prime contractor on-site whenever possible. The OR will provide any [NRC] records which would normally be available under 10 CFR Part 2.790 of the Commission's regulations to project participants upon request to copy. If convenient, copies of such records will be provided by the OR.
7. The OR shall be afforded access to the site, research facilities, and other contractor and subcontractor areas to observe testing or other data gathering activities, in progress, as part of site characterization ~~and site investigation~~ subject to compliance with the applicable requirements for identification, and applicable access control measures for security, radiological protection and personnel safety, provided that such access shall not interfere with the activities being conducted by DOE or its contractors ~~(see point 6 above)~~ and that any discussions conducted during such access shall comply with point 2 above.

Such access shall be allowed as rapidly as it is for DOE or DOE contractor employees upon display of an appropriate access identification badge, or, if badging is not possible for national security reasons, upon prior notification to DOE or cognizant contractor supervisory personnel (by memorandum, telephone, or personal contact). When an access identification badge is available to DOE or DOE's contractors and subcontractors on a routine basis, it shall be made available to the OR upon completion of the required security clearances and appropriate radiological and personnel safety training. DOE will ensure that any training required is provided to the OR.

- [8.] [NRC can videotape or photograph any inanimate objects or geologic features associated with site characterization activities at the Yucca Mountain Site consistent with Nevada test site security. Additionally, upon request from the OR, DOE will provide NRC videotape footage of personnel performing site characterization activities. If requested, the OR and other NRC staff will be permitted to accompany DOE during the videotaping.]
- [9.] [DOE YMPO may provide, to the NRC OR, the information required to execute DOE responsibilities under Appendix 7 of this agreement by informal note, by telephone, or by personal contact. Such communications shall adhere to the procedures for communication and information release specified elsewhere in the Procedural Agreement and this agreement.]
