Commissioner

July 18, 2003

United States Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

Dear Sir:

**Subject: Salem Generating Station, Units 1 and 2
Docket Nos. 50-272 and 50-311
License Change Request S03-03
Request for Changes to Technical Specifications 3/4.11.2.5, Radioactive
Effluents/Explosive Gas Mixture**

PSEG Nuclear LLC submitted the proposed change to the Salem Units 1 and 2 Technical Specifications by letter to the NRC dated June 6, 2003. The proposed change clarifies TS 3/4.11.2.5 for the waste gas holdup system, allowing for removal of portions of the system for maintenance and deletion of the requirement to monitor the hydrogen concentration in the system.

The BNE has no comments on the proposed change. If you need to discuss the subject further, please contact Elliot Rosenfeld at (609) 984-7548.

Sincerely,

Kent W. Tosch, Manager
Bureau of Nuclear Engineering
