ISSUANCE OF CONDITION REPORT (CR) OCRWM(O)-03-D-214 RELATED TO DATA USED AS TECHNICAL INFORMATION

Enclosed is CR OCRWM(O)-03-D-214, related to data used as technical information.

Please provide a response that meets the applicable requirements AP-16.1Q, *Management of Conditions Adverse to Quality*. Send the original of your response to Deborah G. Opielowski, Navarro Quality Services, P.O. Box 364629, Mail Stop 455, North Las Vegas, Nevada 89036-8629.

Response to the CR is due thirty calendar days from the date of this letter. Please notify the U.S. Department of Energy when all actions are complete.

If you have any questions, please contact either William J. Boyle at (702) 794-5506 for technical questions or Kerry M. Grooms at (702) 794-1367 for quality related questions.

William J. Boyle, Division Director
Postclosure & License Acquisition Division

CONDITION REPORT

1. ☒ DR
☐ CAR

CR NO.: OCRWM(O)-03-D-214

Page   of

QA: QA

2. Controlling Document (Document Identifier and Rev. or Effective Date):	3. Related Report No.:
AP-3.15Q, Revision 4, ICN 2, Managing Technical Product Inputs	ANL-NBS-HS-000031, Revision 01

4. Responsible Organization:	5. Discussed With:
Saturated Zone (SZ)	Hari Vishwanathan

6. Requirement:

Section 3.2 Definition of data (collected) - "Factual information obtained from investigation activities such as sample collection, physical measurements, testing, and analyses, both in the field and laboratory (QARD)."

Section 5.3.1b) "During technical product development, determine the product of the technical product input and whether a TBV number is required by using Attachment 3, Input Status Decision Checklist."

Section 5.3.1e) "For technical product inputs needing a new TBV, obtain a Work Package number for working off the TBV from the Responsible Manager. If the Responsible manager does not have, or cannot provide a Work Package number for working off the TBV, escalate the issue through the management chain until a resolution is obtained."

7. Description of Condition:

7a. ☐ Corrected During Activity
(Describe all actions taken to close in Block 7.)

ANL-NBS-HS-000031, Revision 01, Table 3, Input Data (page 19) includes colloid-transport data developed from field breakthrough curves identified as "technical information" rather than unqualified data. Because the colloid-transport data were obtained through investigation activities, they are consistent with the definition of data (Section 3.2). The colloid-transport data do not meet the definition of "technical information." Attachment 3, Input Status Decision Checklist, has been misapplied and should have resulted in the assignment of a TBV (see page 24 of AP-3.15Q, Revision 4, ICN 2, Attachment 3). Also, a Work Package number was not obtained nor was the issue escalated through the management chain for resolution.

8. Initiator:

CR RESPONSE INSTRUCTIONS

The numbered steps represent the numbered blocks on the CR Response. Complete only the applicable information. Mark blocks that are not applicable "N/A." Use the CR Continuation Page or reference attachments if additional space is required.

RM:

If a CAQ does not seem to exist, provide a response on a continuation page and justify the basis for not considering the issue to be a CAQ.

1. Enter the applicable CR number. Do not place page numbers in this block.

2. If deemed necessary to number the submittal pages, enter the submittal page count in the upper section of this block. If the specific submittal is an amended response, check this box.

3. Document the extent of condition investigation activities and include a detailed listing of those items or documents that are found to be part of the extent of condition. If an extent of condition investigation is not warranted, provide justification. For a DR, check the appropriate significance box to represent the RM's assessment.

4. Identify the impact relative to waste isolation, safety, and/or to other work, if any. If there is no impact, then provide justification or rationale as to why there is no impact. Otherwise, mark block N/A if impact statement is not required.

5. a) Provide specific remedial actions that have been or will be taken to address each specific type of condition noted in Block 3.

   b) Include the immediate corrective action taken if not reported on the description of condition to allow work to continue or to mitigate the consequences of the CAQ.

   c) List specific actions in a concise bulleted or numbered format. Actions stated must be verifiable.

   d) Provide names of specific individuals responsible for completing each action and the expected completion date, to facilitate closure verification activities.

   e) If remedial actions are deemed unnecessary or cannot be taken, then provide a clear justification or rationale as to why no actions were taken.

   f) Include, as a remedial action, an appropriate requirement to cross-reference this CR to all affected records identified in the extent of condition (required for all CR Responses).

   g) If the CR documents a significant design deficiency because of an incorrect design, then require a review of the design process, design verification methods, and implementing documents.

6. For a significant CAQ, perform a root cause determination in accordance with AP-16.4Q, and attach it to the response. Provide the apparent cause if the "Cause" box of Block 13 of the CR is checked.

7. Identify those actions to be taken to preclude recurrence of the specific causes identified in Block 6. Actions planned should stem directly from the cause statements. These actions must be verifiable prior to closure of the CR. (This is required if the "Action to Prevent Recurrence" box of Block 13 of the CR is checked, or for a CAR.)

8. Provide the due date for completion of all the corrective actions outlined in the response.

9. Print name, sign, and date.
