Ms. Nancy Alvarado
4353 El Carnal Way
Las Vegas, NV 89121

Dear Ms. Alvarado:

I have received a copy of your letter to President Reagan opposing the siting of toxic waste dumps in Nevada. On the assumption that your letter is related to the proposed commercial repository for high level radioactive waste, your letter has been sent, as a public comment, to our headquarters Division of Waste Management, Repository Projects Branch.

The effort to site the first commercial high level waste repository is the responsibility of the U.S. Department of Energy. The NRC will be responsible for licensing and regulating the facility, and is charged with a review function during the environmental assessment and site characterization phases of the siting effort.

Sincerely,

Gregory N. Cook
Public Affairs Officer
