SUBJECT: EA REFERENCES FOR NNWSI

We have reviewed the latest NNWSI EA references list dated December 27, 1985, received from the DOE. Based on this review, we have selected a list of new documents in the Design/Rock Mechanics area (Enclosure 1) that we would like to receive from the DOE as soon as possible. An early review of these documents is likely to better prepare us for the review of the DOE's Final EA.

In the list of Final EA references, there are a few references for which DOE has not provided full details. These references are listed in Enclosure 2. The DOE should be asked to provide complete details of these references, so that we can evaluate the need for their review.
