Mr. Carl Johnson
Nuclear Waste Project Office
Office of the Governor
Capitol Complex
Carson City, NV 89710

Dear Mr. Johnson:

During the January 25 meeting in Carson City between the NRC and the State of Nevada and in several subsequent telephone conversations, the State requested various documents from the NRC staff. I have received your March 12 letter to Rob MacDougall, which confirms your earlier requests. Enclosed are those documents which are presently available.

The plan and schedule for technical model studies that you requested is still in internal draft form and is too preliminary for external distribution. Another item requested, the staff's proposed revisions to 10 CFR 60, Subpart C, have not yet gone to the Commission for approval and therefore cannot be released. You have already been given copies of draft Site Technical Positions in geology and hydrology; other Site Technical Position papers will be forthcoming in an August time frame.

Also enclosed are several additional items which although not specifically requested by you might be of interest:

1. Draft NRC Review Plan: Quality Assurance Programs for Site Characterization of High Level Nuclear Waste Repositories;
2. Selected NRC Products, High Level Waste Program (list);
3. Waste Management Related NUREGs (list);
4. Waste Management Technical Positions (list);
