Ms. Catherine Russell  
Policy and Program Control Branch  
Division of Waste Management  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Ms. Russell:

I would like to request the following information from the NRC:

1. NUREG-0957 "Price-Anderson Act". Date December, 1983.
2. All comments submitted to NRC relative to proposed amendment to 10 CFR Part 60 Technical Rules on the Unsaturated Zone. The comment period closed April 16, 1984.
3. Current status and completion schedule of NRC's position paper relative to definition of "Disturbed Zone".
4. Federal Register notice on proposed rule to limit interaction of interested parties in the reactor licensing process. My description of the notice is somewhat vague, but I believe it appeared in the Federal Register in the last 30-60 days. It may be part of a broader reactor rulemaking announcement. We believe this proposed rule may have implications for the high-level waste repository licensing process.

Please do not hesitate to contact me if clarification is required.

Regards,

Carl A. Johnson  
Technical Program Manager
