WM BOCKET CONTROL CENTER

Mr. John Davis, Director
Office of Nuclear Material Safety
and Safeguard
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Davis:

I have recently received the Commission's Standard Review Plan for the draft environmental assessments prepared by the Department of Energy regarding the recommendation of sites for site characterization. In this Plan, provisions have been made to constitute a "Readiness Review Team" to conduct a peer review of the Commission comments on these draft EA's.

I would like to request, at this time, that the State of Nevada be afforded the opportunity to become a member of the Readiness Review Team as it relates to review of the Commission's comments on the Yucca Mountain draft EA. I believe that this office could assist the Commission and other members of such a team in the early identification of potential safety and license issues that would be of interest to the Nevada site. Subpart C of 10 CFR Part 60 provide for this type of state interaction and involvement, and I am making this request in that context.

I look forward to hearing from you on this matter. If you have any questions, please do not hesitate to contact me.

Sincerely,

Robert R. Loux
