Memorandum Return 18 VIM, 623-85) Obert E. Browning, Director Division of Waste Management

From: Paul T. Prestholt, Senior On. S.te Licensing Rep. NNWSI

Subject: NNWSI Site Report for Week of Feb. 13, 1984

1. I received and reviewed the draft "Standard Review Plan for Draft Environmental Assessments." The document is full of typo's and is in need of polishing before it leaves the Division. It should be noted that the siting quidelines (A1.2, page 6) and the detailed outline for the E.A. make no mention or provision for issues in structure! geology or stratigraphy. During production of the BWIP SCA, issues in these two evers were not adequately covered by the hydrology or design groups and were picked up in chapter 4, geology /geologic stability. A number of important issues could have "slipped through the cracks and these topics should be provided for in the Draft Standard, Review Plan for E.A.'s.

The accident that occurred on Wednesday, Feb. 15 at Rainier Mesa was the result of the nuclear test "Midas Myth/Milagro". The explosion took place 1168 feet below Rainier Mesa in a "tunnel dug through hard rock." The test took place at 09:00 and the collapse occurred at 12:15 PM. The crater measured 10' to 30' deep, 60' wide and 150' long. DOE stated that the ground collapse was "unusual and not expected."

NV843669

265

The event measured 4.9 on the Richter scale according to the National Earthquake Information Center in Denver and between 4.5 and 5 at the University of Neveda at Les Vegas (UNLV).

I will try to find out more about the "hard rock" in which the event took place but for the moment it should be assumed to have been Tuff, probably non-welded.

3. I med with Jerry Szymanski, the DOE individual who will be working flicensing and regulatory matters. Jerry was a member of the DOE salt team in Columbus and arrived in las legas last monday. Jerry's first task (with Mike Gloria, SAI) will be to set down the details of wmpo's compliance with the provisions of the Bennett-Browning letter (Site Specific Agreement). I have been asked to review this work. I will be given a copy of the Bennett-Browning letter this afternoon and copies of the first working drafts of the WMPO's response. I will forward copies to the division as appropriate

Sonor On-5, to Licensing Rep. NNWSI.
