

- o If, during the NRC regulatory process, the NRC denies the operating license for the site for which DOE already has constructed the facility, what is contemplated under the national program to achieve a repository?
- o If a state raises a significant technical issue with DOE and DOE rejects the state's concern, what opportunities does the state have to request NRC to pursue the issue? If the state has no "right of appeal to NRC," what can the state expect from the NRC?

Again, I appreciate the opportunity to appear before the Nevada High-Level Nuclear Waste Commission.

Sincerely,

(SIGNED) John G. Davis

John G. Davis, Director  
Office of Nuclear Material  
Safety and Safeguards
