Topics of conversation were:

1. NRC's perception of EEI's role in the waste program;
2. What could EEI do to help the program be successful;
3. A general discussion of the geotechnical program including meetings, SCP review, both NRC and EEI, State of Nevada's technical program, and the site characterization schedule;
4. A general discussion of QA activities.

Mr. Smith and Mr. Colandrea asked to be put on this office's mailing list for the monthly OR reports. At your direction, they have been told that these reports are sent directly only to interested Federal Government agencies and to the State of Nevada as a courtesy. EEI may contact you on this matter.
