Dear John:

During the recent NNWSI Geochemistry Workshop, I mentioned that the Los Alamos National Laboratory is using the CHEMTRN transport model. You said that the NRC is also using this model and that we should get together so we both use the same version. I would like to find out who at NRC is using CHEMTRN and who controls the official version. Can you put me in touch with the right people so I can request a copy of your official version?

Sincerely,

J. F. Kerrisk
