MEMORANDUM FOR: Richard E. Cunningham, Director
Division of Industrial and Medical Nuclear Safety, NMSS

FROM: Robert E. Browning, Director
Division of High-Level Waste Management, NMSS

SUBJECT: IMPLEMENTATION OF NRC MANUAL CHAPTER 0524

In a memorandum sent to me from John Hickey, Chief, Operations Branch, IMNS, on June 27, 1990, the DHLWM was asked to review two documents that are intended to implement NRC Manual Chapter 0524. These documents contain: (1) procedures identified in a statement of work for a contract that would provide radiation dosimeters for any headquarters employee who could be exposed to ionizing radiation while inspecting or visiting nuclear facilities while on official NRC business; and, (2) draft specifications for an "employee exposure database" (EED) to maintain records of any such radiation exposures for the NRC.

Both the procedures and the specifications are acceptable to the Division of High-Level Waste Management.
