TRANSMITTAL OF INSERTS FOR NEVADA NUCLEAR WASTE STORAGE INVESTIGATIONS (NNWSI) DRILL CORE PHOTOGRAPH BINDERS

In January 1985 your office received by registered mail two boxes that contained one complete set of 8" x 10" color photographs (about 1,500 prints) of all NNWSI drill core. These photographs were in chronological order (according to negative number) and covered the entire Yucca Mountain drilling program from the beginning in 1978 through the end of calendar year 1984. The Waste Management Project Office (WMPO) has organized its pictures into ten volumes. Each volume is a four-inch white binder with plastic insert pockets on the spine and face of each binder. The pictures are arranged in depth sequence by drill hole (back-to-back) in clear plastic document protectors. In the spirit of cooperation, a set of the binder inserts are enclosed herewith should you desire to organize your drill core photographs in the same manner.
