REFERENCES CITED IN THE YUCCA MOUNTAIN, NEVADA, DRAFT ENVIRONMENTAL ASSESSMENT

A set of the references cited in the Yucca Mountain Draft Environmental Assessment (EA) has been sent to your attention at the above address under separate cover. These reference copies have been provided as photocopies of the original documents. The set constitutes nearly all references cited. We expect to provide you copies of the few references cited but not included in this set within a few days. Unfortunately, we do not yet have all of the references since some of the chapters were not prepared by the NNWSI Project and we are still trying to obtain copies of those references missing.

While every attempt has been made to provide high quality copies of the references, certain of the originals provided to this office were of marginal clarity. If during your review of the Draft EA you find that a supporting reference is illegible, please notify Maxwell Blanchard (FTS 295-1091) and provide the author and title of the reference required. It is anticipated that the full set of references will soon be available on microfiche. If it would facilitate your review effort, the references in this form will be made available at your request.
