(Return to WM, 623-SS) 12

Dear Mr. Coplan:

This is a follow up to my letter to you of September 6, 1984 which transmitted some of the hydrologic data requested following the NRC data review held in July 1984. By my count, two sets of data remain to be sent to you: 1) a TV log of well USW UZ-1 and 2) Yucca Mountain ground-water chemistry data. Item 1 should be obtained by addressing your request to Bill Garms, Fenix & Scisson, Inc., Mail Stop 940, Mercury, Nevada 89023 (FTS 575-6588). Fenix & Scisson has the master copy from which copies can be made. Item 2 is being compiled into a report and is expected to be available about August 1, 1985. We will send a copy when completed. If I have overlooked any other requested data, please let me know.
