**Subject:** Correction to last e-mail

Dear Kathy:

In my last e-mail I gave an incorrect count of how many sources I have in the various kinds of shields. I noticed that my inventory included a lot of sources in storage pigs for which the inventory still showed the shields that held the sources before they were transferred to the pigs. I corrected the inventory to reflect the present status of these sources.

The corrected count is

Sources in Gammatrol shields	252
Sources in LB 7400 Series shields	44
Sources in LB 300 Series shields	37
Sources in SeCoal shields	16 (all Ra-226)
Sources in Transport shields	none
Sources in Pigs (removed from shields)	94
Sources in New World shields	9 (Photon sources)
Sources in Other shields	3

Sorry for any inconvenience this mistake caused you.

Regards,  
Edwina
