

DOCKET NUMBER
PROPOSED RULE NO. 20

(68FR 09595)

2652

From: "Azal Hill Beckner" <azelb@hotmail.com>
To: <allegation@nrc.gov>
Date: Sun, Aug 10, 2003 1:56 PM
Subject: Paducah Kentucky Nuclear Reactor

Dear Sir:

I am concerned about the distribution of nuclear material as in radioactive contaminated objects and soil.

Where will this material be placed and who will be endangered?

If the material is unregulated and used for anything without concern for the danger to those who are exposed to the material then there is a great deal of hazard to the public and the environment involved in the cleaning up of the Paducah breeder reactor area. This enlargement of the problem of radioactive substance should be stopped immediately.

Sincerely,

Azal Hill Beckner
