 (Signature of person authorized to sign)

**QUALITY ASSURANCE SURVEILLANCE PLAN
CONTRACT NO. NRC-38-01-285**

INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) has been developed pursuant to the requirements of FAR 37.602-2 for Contract No. NRC-38-01-285. This plan sets forth procedures that will be used in evaluating the technical performance of the contractor.

A. Purpose of the QASP

1. The QASP is intended to accomplish the following:

- a. Define the roles and responsibilities of participating government officials;
- b. Define the types of work to be performed;
- c. Describe the evaluation methods that will be employed by the government in assessing the contractor's performance;
- d. Provide copies of the quality assurance monitoring forms that will be used by the government in documenting and evaluating the contractor's performance; and
- e. Describe the process of performance documentation.

2. The contractor has developed a Quality Control Plan (QCP) which sets forth procedures and responsibilities for controlling high quality work. The contractor has designated his employee, George Moran, to be responsible for implementation of the QCP.

B. Roles and Responsibilities of Government Officials

The following government officials will participate in assessing the quality of the contractor's performance. Their roles and responsibilities are described as follows:

1. Paul Knapp will serve as the NRC Project Officer and be responsible for monitoring, assessing, recording and reporting on the technical performance of the contractor in accordance with the "Performance Requirement Summary." The PO will have primary responsibility for completing "Surveillance Monitoring Forms" which will be used to document the inspection and evaluation of the contractor's work performance.
2. Mona C. Selden will serve as the NRC Contract Specialist (CS) and has overall responsibility for overseeing the contractor's performance. The CS will also be responsible for the day-to-day monitoring of the contractor's performance in the area of contract compliance and contract administration; reviewing the PO's assessment of the contractor's performance; and resolving all differences between the PO's version and the contractor's version.

C. Types of Work Performed

1. Training

The contractor shall instruct the Safety Aspects of Industrial Radiography Course.

2. Training Support

- a. The contractor shall provide each student with a three-ring binder containing the course material in accordance with Section B.4.5.
- b. The contractor shall develop/furnish case studies and "real life" workshop examples to supplement the course lectures in accordance with Section B.4.5.
- c. The contractor shall utilize visual aids (view graphs, slides, etc.) to assist the student's understanding of the subject matter in accordance with Section B.4.5.
- d. The contractor shall utilize learning objectives for each course lecture, and formal lesson plans for presenting the course lectures, problems, exercises and demonstrations in accordance with Section B.4.5.
- e. The contractor shall develop and provide the NRC Project Officer with at least three (3) course examinations in accordance with Section B.4.5.
- f. The contractor shall furnish personnel monitoring equipment for each student in accordance with Section B.4.5.
- g. Within 30 calendar days of completion of a course presentation, the contractor shall submit a Course Presentation Report to the NRC Project Officer in accordance with Section B.9.

D. Methods of Surveillance

1. **Based on student evaluations, the PO will monitor actual classroom instruction to determine if training is effective; i.e., instructor succinctly and accurately imparts information and knowledge, responds to students questions and remarks and maintains course schedule.**
2. Information from course evaluations and tests will be evaluated to determine if course objectives and performance measurements have been met.

E. Quality Assurance Forms and Report

1. The PO will use the Surveillance Monitoring Form (Attachment No. 7) to document and evaluate the contractor's performance under the contract.
2. The PO will judge each requirement in accordance with the performance standards and performance requirements stated in the Performance Requirements Summary (PRS).
3. The PO will substantiate all requirements which the PO judges to be indicative of "unacceptable" performance. Performance at the "acceptable" level is expected from the contractor and need not be substantiated.
4. The PO will forward copies of all completed surveillance monitoring forms to the CO and contractor upon completion of the form. The contractor is required to respond in writing to any negative QA monitoring form(s) within 5 working days after receipt of the form.

F. Analysis of Surveillance Results

The CO will review each monitoring form prepared by the PO. When appropriate, the CO may investigate the performance event further to determine if all the facts and circumstances surrounding the event were considered in the PO's opinions outlined on the forms. The CO will discuss every event receiving a substandard rating with the contractor prior to taking the reduction in price.
