Jack,

I received a question from Dwight Case (through OCA) regarding the number (and nature if possible) of open items remaining in response to the NRC's 1996 50.54(f) letter.

The question arises from a newspaper article (Cleveland Plain Dealer) dated June 23,2003. Page 2 of the article references the 1996 design basis letter and indicates that as of February 2003, there were 200 remaining deficiencies that had not been resolved.

Questions:

1. How many of these items remain open?
2. If possible can you describe the nature of the items?

Thank you,

Laura A. Dudes
