Subject: Licensee Event Report for OverExposure at SW Mo Univ

Beth,

NRR has established a new centralized mailbox to handle all Information Review requests.

Bill Reckley and Margie Kotzalas will get back to you regarding the whether we can provide this information to this requester.

In the future to expedite the processing of such requests please send all requests to NRR_INFOREVIEW.

Carl

Can you direct me to the appropriate person on NRR who can decide whether we can provide this information to this requester?

Pam,

The Off-Site Source Recovery Project, staffed and operated at Los Alamos National Laboratory for the Department of Energy, routinely recovers Am and Pu sources for management at the Laboratory. May of the licensees dependent on this project for relief, are universities.

I am interested in obtaining a copy of the Licensee Event Report for the southwest Missouri State Univeristy incident to use in lessons learned training for our staff. With the current attention to information made available to the public and changes in your web pages, i cannot locate it on line.

please advise how I may receive a copy of this document for our staff training. If more information is required, feel free to contact me at the numbers shown.

Thanks,

Mike
