Re: NRC Meeting, Silver Spring, MD, 5-24/25-84.

The meeting has been attended at the request of NRC, WMEG.

Part 1. EA review plan.

The NRC plan for the review of EA's has been presented. Preliminary drafts of some EA chapters have been provided for familiarization.

Part 2. Key document review.

Updated lists of key documents, directly relevant documents and data review documents have been provided. Present status has been reviewed, and some modifications have been made to review format sheets. Clarification has been provided on some aspects of data review.

Part 3. Preparation for ONWI data gathering meeting.

Preparatory information for this meeting has been provided. Data sources to be reviewed need to be identified.

Part 4. Exploratory shaft construction and sealing.

Issues related to exploratory shaft construction and sealing have been reviewed. A summarizing document has been drafted. Final comments are to be provided to NRC by June 6, 1984.
