Subject: Re: geis on license renewal

Dear Chip -- that was really sweet of you! I hope you sent this to BREDL too? It is nice that the Atlanta meeting is one day after the DOE pit meeting in N. Augusta -- we will have a regular nuclear relapse tour!

I have the need for two things -- first is a pointer towards any document or speech or review of the relationship between the GALL process / product and this new venture. Second is something that I know I requested in the Duke renewal process, and likely was sent to me, but for the life of me, I cannot now find: the technical guidance documents used to calculate the costs associated with human deaths attributable to commercial nuclear activity.... you know, the 12 per 20 years of operations and the trade-off calculations for the SAMA analysis. You would think I would have that....

Well, anyway, I know I can pester the folks at the PDR, but I thought I would give you a try since you have this incredible database in your brain during public meetings...I figure it does not go away when you give back the cute little cordless mic!

Pete says he hopes you are well and happy...and cleaning things up! See you in Atlanta?
