Seattle, Washington 98124

Dear Mr. Galster:

Subject: Interagency Agreement (IA) No. NRC-02-81-036 Entitled "U.S. Army Corps of Engineers, Geotechnical Assistance," (Ltr. No. 27)

As agreed in our telephone conversation of November 17, 1983, you are to participate in a workshop in Richland, Washington, between DOE, Rockwell Hanford Operations, their contractors and advisors, and NRC personnel. This workshop is scheduled to take place during the week of November 28, 1983. The subject of this workshop is in-situ testing in the exploratory shaft and underground test facility. The authority to attend this meeting is described in Task Order No. 10 of the subject interagency agreement entitled "Review of Technical Reports and Make Site Visits as Scheduled." This T.O. (Ltr. No. 24) was sent to Ben Kelly on April 14, 1983.

Dr. Robert Wright will contact you before COB, Wednesday, November 23, 1983, with the time and place of the meeting. It is tentatively scheduled to start Monday morning, November 28, 1983 at Nendels, SeaTac, proceeding to Richland, Washington Monday afternoon.

It is suggested that you contact Mr. Lou Gonano, Golder Associates, and obtain a copy of Chapter 2, Volume 2 of the "In-Situ Test Plan" prior to the meeting.

It is anticipated that a letter report, as specified, with your comments will be sufficient. However, this should be coordinated with Dr. Wright at the conclusion of the meeting.
