There's also some *tasty* NUREGs on the list, as well as the nasty ones - thought you should also know that, with OCIO assistance we've already taken action to post **NUREG-1437, Vol 1** (GEIS for renewal) to support the hearing process - that and the RIC are the only things on the reactor page. Vol 2 was withheld in accordance with the guidance. We'll support the review team, but we would also like to propose that all of the NUREGs we had on the Renewal Webpage before be restored. That's what we asked for in the separate Web restoration priority survey.

TJ:

Ticket to Margie for coordination with the review team. There's some nasty NUREGs in there!
