Subject:	Re: Tech Specs on the Web

I need to close back with Jon Johnson at some point (the sooner the better). Can you let me know what happens at your meeting? Thanks.

We are going to meet this afternoon to discuss this and other matters re: the release of information. My understanding of the STS issue is that the STS were removed from ADAMS as an initial response back in Oct. and when we decided that they were not sensitive and could go on the web site, we should have cross-checked their status in ADAMS. The inconsistency was raised as an issue by OCIO (Lynn S.)

Senior management got buttonholed in the hallway by L. Scattolini expressing angst that, contrarry to original post Sept 11 direction to "burn all copies", standard tech specs was back on the public website. Do you have any insight on this? Could she be thinking of the "plant information books"? Thanks.
