Subject: Sensitivity Review of NUREGs for Web Publication
Place: NRR_INFOREVIEW

Closure of YT 020010209

Gil,

NRR Inforeview has reviewed all NUREGS for which NRR is the cognizant office and that are contained in Attachment 1 of your December 3, 2001 email. With the exception of NUREG-1738 "Technical Study of Spent Fuel Pool Accident Risk at Decommissioning Nuclear Power Plants," all NUREGS are acceptable for public release.

During our review, we also identified one NUREG which is no longer current and does not need to be reposted to the web. It is NUREG-1706 "Year 2000 Readiness in U.S. Nuclear Power Plants."

Margie
