If you could finish your FSAR review next week, that would be good!

>>> NRR_INFOREVIEW 01/23/02 10:03AM >>>

The license renewal application and environmental report for Ft Calhoun have been reviewed and may be released to the public without restriction. We will review the FSAR to identify portions that may need to be withheld. We will contact you when we are finished (hopefully next week). If there is a need to speed up the review of the FSAR, please let us know. If the FSAR is provided on the CD, it would be helpful if we could get a copy of the disk. Thanks...Bill.
