Subject: Release 4 - FYI

Place: NRCWEB

Clinton:

As per our phone conversation -

When release 4 goes out, there are two pages within reactors that need to be deployed at the same time. The reason for this is there has been a toolbar added to the License Renewal Page and The Tech Specs page to match the one on the Power Uprate page. There have been no other changes to these two pages, other than the toolbar. However, they should not be posted to the external until release 4, because the toolbar on these pages has an active link to Power Uprate that is scheduled for Release 4 etc.

These pages need to be deployed w/ Release 4, please move to 300 for testing etc.

/reactors/operating/licensing/renewal.html
/reactors/operating/licensing/techspecs.html

Thanks
Sally Jewell
