Kathy Halvey Gibson, Chief  
Emergency Preparedness and  
Health Physics Section  
Operator Licensing, Human Factors  
And Plant Support Branch  
Division of Inspection Program Management  
Office of Nuclear Reactor Regulation  
Nuclear Regulatory Commission  
Washington, D.C. 20555-0001

Dear Ms. Gibson:

This letter is in response to your request dated April 25, 2003, concerning the proposed restart of the Davis-Besse Nuclear Power Plant in the State of Ohio.

The Regional Assistance Committee Chair of FEMA Region V has provided the enclosed document reflecting Region V's assessment of the State of Ohio that there are no current offsite emergency planning issues.

Based on the enclosed documentation, we support Region V's conclusion that the State of Ohio's plans for the plume exposure emergency planning zone around the Davis-Besse Nuclear facility are adequate.

If you have questions or require additional information, please contact me at (202) 646-3664 or Pat Tenorio of my staff at (202) 646-2870.

Sincerely,

A handwritten signature in black ink, appearing to read "Vanessa E. Quinn". The signature is written in a cursive style.

Vanessa E. Quinn

Chief

Radiological Emergency Preparedness Branch
