Subject: ASAP!!!!
Place: NRCWEB

Good morning,

Sally is out today and I need this done ASAP PLEASE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! I have attached the changes to the Reactor Vessel Head Degradation page. The file is vessel-head-degradation.html. The attached table should be inserted before the References table on that page with a respective anchor link on the menu at the top of the page called Public Meetings.

If you have any questions, please call me x3733.

P.S. I will come over today because I also need updates done to the RIC page and as I mentioned before Sally is not here today. Please let me know when is a good time as soon as you get a chance.

Thanks
Takiyah
