Subject: Fwd: Re: NUREG-1759

To Whom it may concern:

I am forwarding my letter to Linda Stevenson (NRC publishing branch 6th floor TWFN) that provides the Division of Reactor Program Improvements' (NRR) bases for releasing (publishing) NUREG-1759, Safety Evaluation Report Related to the License Renewal of the Turkey Point Nuclear Plant, Units 3 and 4.

Please review the e-mail sent to Linda Stevenson, and forward a confirmatory statement approving a release of NUREG-1759 for publication. Consistent with the Commission's Comments on COMSECY-01-0030, dated January 25, 2002, NUREG-1759 contain no secret, classified, proprietary, or sensitive material that should be restricted and withheld from the public. Publication of this NUREG is consistent with NUREG Safety Evaluation Reports that have previously been released to the public for publication (i.e., NUREG-1705 for Calvert Cliffs Nuclear Plant, Units 1 and 2; NUREG-1743 for Arkansas Nuclear One, Unit 1; and NUREG-1723 for Oconee Nuclear Station Units 1, 2, and 3; and NUREG-1803 for the Edsin I. Hatch Nuclear Plant, Units 1 and 2).

Please CC: Charles Reed, Rajender Auluck, Pao-Tsin Kuo, and me (James Medoff) in your confirmatory e-mail to Linda Stevenson. Linda may be reached by phone at 415-7085; I may be reached by phone at 415-2715.

Thankyou,

Jim Medoff, Project Manager - Turkey License Renewal Project
