

August 28, 2003

Mr. Michael B. Allred
[HOME ADDRESS DELETED
UNDER 10CFR2.790(a)]

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-003)

Dear Mr. Allred:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA by Roy Caniano Acting for/

Cynthia D. Pederson, Director
Division of Reactor Safety

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-013)

Dear Mr. Dodd:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA by Roy Caniano Acting for/

Mr. John C. Doyle
[HOME ADDRESS DELETED
UNDER 10CFR2.790(a)]

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-014)

Dear Mr. Doyle:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

Mr. James J. Gulas
[HOME ADDRESS DELETED
UNDER 10CFR2.790(a)]

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-023)

Dear Mr. Gulas:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA by Roy Caniano Acting for/

Cynthia D. Pederson, Director
Division of Reactor Safety

Dear Mr. Koppen:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

T. Koppen

-2-

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA by Roy Caniano Acting for/

Cynthia D. Pederson, Director
Division of Reactor Safety

Mr. Mitchell D. Roether
[HOME ADDRESS DELETED
UNDER 10CFR2.790(a)]

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-044)

Dear Mr. Roether:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-051)

Dear Mr. Stobert:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). Mr. David B. Throne
[HOME ADDRESS DELETED
UNDER 10CFR2.790(a)]

SUBJECT: CLOSURE OF NOTICE OF ENFORCEMENT DISCRETION REGARDING
OPERATOR LICENSE CONDITIONS (NOED-02-3-052)

Dear Mr. Throne:

This refers to our July 17, 2002, letter confirming the Notice of Enforcement Discretion (NOED) issued to you on July 3, 2002, at the request of the Exelon Generating Company (Exelon). The request was based on information from the Exelon staff that confirmed that the comprehensive written examination, required by 10 CFR 55.59(a) for your NRC license, was not administered within the required time period. This resulted in a violation of the terms and conditions of your NRC license.

Based on the results of our August 26-30, 2002, inspection at the Dresden Nuclear Power Station, we determined that a scheduling error by training department personnel caused the NRC required comprehensive written examination not to be scheduled within the required 24 months. After considering the information developed during the inspection, the NRC has decided not to take enforcement action against you in this matter and we are closing the NOED, based on your successful completion of the required written examination.

Although scheduling and implementing the requalification program is Exelon's responsibility, it is your responsibility to ensure that you are meeting all conditions of your license. This includes successfully completing all portions of the biennial requalification program (including the annual operating examination and biennial comprehensive written examination). The NRC expects that an individual licensed by the NRC is always aware of the conditions and restrictions of the license and knows the current status of those conditions and restrictions at all times.

You are not required to respond to this letter. However, should you choose to respond, your response should be sent to the U.S. Nuclear Regulatory Commission, ATTN: Regional Administrator, Region III, 801 Warrenville Road, Lisle, Illinois 60532-4351, and marked "Open by Addressee Only."

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter, and your response, if you choose to submit one, will be placed in your license docket, and will be available electronically (with your personal privacy information redacted) for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA by Roy Caniano Acting for/

Cynthia D. Pederson, Director
Division of Reactor Safety
