Sandia National Laboratories
Albuquerque, NM 87185

Dear Dr. Siegel:

SUBJECT: CONTRACT NO. 50-19-03-01/FIN A-1756, "GEOCHEMICAL SENSITIVITY ANALYSIS"

I have reviewed the January 1987 monthly progress report for the above contract, dated February 15, 1986. Based on my review of this report, progress to date is satisfactory.

In response to your question concerning the report on the Aqueous Solutions Database, BES can be acknowledged along with the NRC. I am planning to visit a technical library (such as at the NBS) to ascertain how much work will be required to collect the data needed for the CATCH simulations.

I am tentatively scheduling your visit to the NRC for the week of March 30. I suggest a two-day visit, with you giving a project overview the morning of the first day. The rest of the time would be spent in discussions with various cognizant members of the Division of High-Level Waste Management. By the way, a new branch chief has been named for the Technical Branch in the HLW Division, Ronald Ballard. John Starmer has been named acting branch chief of the Operations Branch of the Division of Low-Level Waste Management and Decommissioning. I enclose copies of the new organization charts. I am also enclosing an announcement for the DOE/AECL meeting on Sensitivity and Uncertainty Methods to be held in September.

The action taken by this letter is considered to be within the scope of the current contract FIN A-1756. No changes to costs or delivery of contract products is authorized. Please notify me immediately if you believe this letter would result in changes to costs or delivery of contracted products.

Sincerely,

151

Walton R. Kelly
