We have reviewed the proposal submitted by CorSTAR Research Inc. to perform the following work under Optional Task 6, Technology Transfer: (1) complete the transfer of the benchmarked version of the designated computer codes by ensuring that they are available for NRC use on a government facility and provided with an annotated user's manual and a facilities specific user's guide, (2) transfer the technology surrounding the benchmarking procedures and solutions to benchmarking problems, including QA procedures, and (3) prepare a letter report on the technical basis for benchmarking and software quality assurance. We find the proposal acceptable.
