Dear Dr. Chung:

We have reviewed LLNL Monthly Management Letter No. 4, dated December 4, 1986 that summarizes progress under FIN A-0297 for the month of November, 1986. Progress to date appears to be satisfactory. We have the following comments:

Please coordinate any additional action on the topical report, "Structural Model, Deformation Style, and Age of Deformation of the Yakima Fold/Thrust Belt, South-Central Washington and North-Central Oregon," with the BWIP lead, Harold Lefevre. At this time we do not intend to have this report published as a NUREG. During discussions with Burt Slemmons at the AGU Fall Meeting in San Francisco he expressed to me his intentions to propose a remote sensing study of tectonic structures near the Hanford, Washington region. He gave me a copy of the preliminary proposal he sent to you and he is intending on discussing this proposal with us during a trip to this area in January. Please let me know if you also plan to attend this meeting.

The Attachment A accompanying this Monthly Management Letter is an estimated project financial status for the month of September 1986. I was expecting to receive the status for the month of October 1986. Please provide me with a copy of your estimated project financial status for the month of October 1986.

The action taken by this letter is considered to be within the scope of the current contract (A-0297). No changes to cost or delivery of contracted services and products are authorized. Please notify me immediately if you believe that this letter would result in changes to cost or delivery of contracted products.

Sincerely,

15/
Michael E. Blackford, Project Manager
