Dear Dr. Chung:

We have reviewed LLNL Monthly Management Letter No. 12, dated August 5, 1987, that summarizes progress under FIN A-0297 for the month of July 1987. Progress to date appears to be satisfactory. We have the following comments:

We have received the trip report prepared by C. Rus Purcell dated 27 July 1987 regarding the field trip with the Nevada Bureau of Mines and Geology to observe rock varnish sampling techniques. Also, with regard to the Yucca Mountain site, we have received the letter report on "Stress Orientation Determination from Fault Slip Data in Hampel Wash Area, Nevada and Its Relation to Contemporary Regional Stress Field." We also received the letter report on "Origin of Brine in the San Andres Formation, Evaporite Confining System, Texas Panhandle and Eastern New Mexico," which is of concern for the Deaf Smith County, Texas site. These documents have been distributed to the site leads and other staff for their information and consideration.

Under separate cover we are sending you copies of information provided to us by the BWIP on-site representative on the most recent quarterly DOE/States and Tribes meeting together with Harold Lefevre's comments and copies of the most recent information we have regarding the release of the SCP's.

The action taken by this letter is considered to be within the scope of the current contract (A-0297). No changes to cost or delivery of contracted services and products are authorized. Please notify me immediately if you believe that this letter would result in changes to cost or delivery of contracted products.

Sincerely,

**ORIGINAL SIGNED BY**

Michael E. Blackford, Project Manager
