Dr. Dae Chung
Staff Scientist
Lawrence Livermore National Laboratory
University of California
Livermore, CA 94550

Dear Dr. Chung:

We have reviewed LLNL Monthly Management Letter No. 15, dated November 5, 1987, that summarizes progress under FIN A-0297 for the month of October 1987. Progress to date appears to be satisfactory. We have the following comments:

All deliverables referred to in the monthly management letter have been received and have been distributed to the appropriate staff for their attention and/or action. The letter report on normal faulting, dated October 16, 1987, was of particular interest due to its implications for possible NNWSI faulting. We thank you for bringing the article, which was the subject of the letter report, to our attention and we shall also review the article.

The action taken by this letter is considered to be within the scope of the current contract (A-0297). No changes to cost or delivery of contracted services and products are authorized. Please notify me immediately if you believe that this letter would result in changes to cost or delivery of contracted products.

Sincerely,

Michael E. Blackford, Project Manager
Geology/Geophysics Section
Technical Review Branch
Division of High-Level Waste Management
Office of Nuclear Material Safety
and Safeguards
